INTRODUCTION

This guide describes the features of the **M-GAS (spot gas market MP-GAS and forward gas market MT-GAS)**, **MGS (the regulated market for the trading of gas stored)**, **MPL (locational products market)**, **MAST (gas market for SRG TSO auction)** which belong to the **Gas Market Platform**. The guide is intended for participants, who will find here all the pages of the portal and the description of all the features that they may access.

TYPES OF USERS

M-GAS, MPL, MAST and MGS platforms distinguish between **users** and **participants**. The user has the credentials to participate in the M-GAS platform, or in the balancing market platforms MGS and MPL, and in the Gas Platform for SRG TSO MAST auctions and use their features. Each user may be associated with one or more gas market participants. Therefore, each transaction towards the system is carried out by the user on behalf of a participant.

The portal manages two types of users:

- **User**: conventional user authorised to use all the features available for participants, e.g. submitting transactions.
- **Viewer**: user authorised only to view the data without submitting transactions into the system.
- **MT-GAS user**: similar to the user, he/she may submit and manage bids/offers only for the products of the forward segment, i.e. all types of products except those for the MI and MGP. For MI and MGP products, this user acts as a viewer.
- **MGAS user**: similar to the user, he/she may submit and manage bids/offers only for the products of the spot segment, i.e. only the types of products for the MI and MGP. For the remaining types of products, this user acts as a viewer.

In this guide, unless otherwise specified, reference will be made to **users**.

The four portals are integrated. Therefore, an M-GAS user is also authorised for the MPL balancing platform and for the balancing markets MGS and for the Gas Platform for SRG TSO MAST auctions. In this case, the user shares the access and signature credentials (as shown later on) among the various platforms.

Conversely, a gas market participant is authorised always for all the platforms (M-gas, Mgs, Mpl and Mast with a unique authorization to MGAS). The user accessing the M-GAS will have all participants assigned to him enabled for that platform.

THE FEATURES OFFERED BY THE MGAS PORTAL

This section describes the features offered by the portal. First, the user must obtain access to the portal. After completing all the procedures specified by the applicable legislation, the user must register with the portal as indicated in the following paragraphs.

REGISTRATION WITH THE PORTAL

Go to the <https://gas.ipex.it/gaswebsite/Register.aspx> page and submit your credentials. When you try to access the page, you will get a pop-up window (Figure 1). On this window, you may select the certificate to be used for future authentication with the portal. Select one certificate and click on **Ok**.

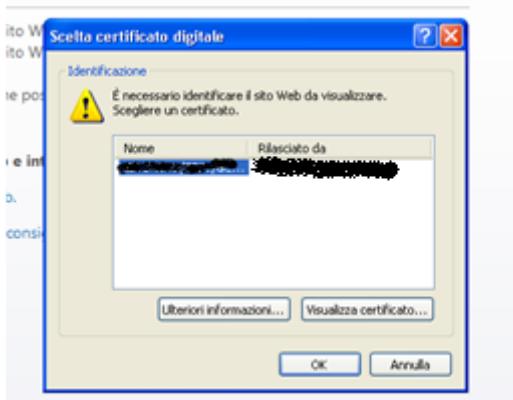

Figure 1: selection of authentication certificate

In the page shown below, you may enter your key data for registration, i.e. your name and surname and the registered name/company name of the participant with whom/which you are associated. You may also add a textual note to your identification data.

REGISTRATION DATA

name:	Utente
surname:	Test
market player:	Gas Demo S.p.A. <input type="button" value="x"/>
notes:	

Reset

Figure 2: entry of key identification data

After filling in the required fields, click on **invia** (send) to enter your request into the system. You will receive a message about successful or unsuccessful completion of the request.

AUTHENTICATION

Authentication with the portal takes place through a **client authentication certificate**.

After authentication, you will retain the credentials to operate on the portal until the session expires or is explicitly closed.

SIGNATURE CERTIFICATE MANAGEMENT

To use a signature certificate, you must set up your computer in order to support software certification, as explained later on.

SIGNATURE SUPPORT SET-UP

To authenticate with the portal and sign the content of messages, you must install a plug-in which supports certificate activities. First, download the installation file from GMECabs/GMECabs.exe.

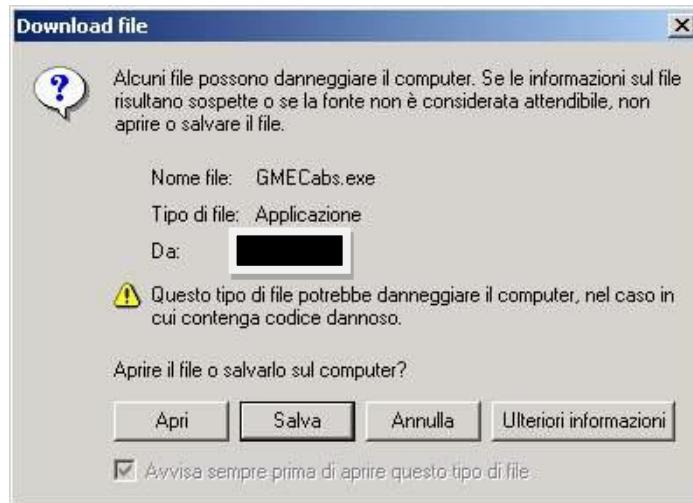

Figure 3: Plug-in download

After completing the download, save the file without running it (Figure). Save the file to any directory, e.g. **c:\plugin**.

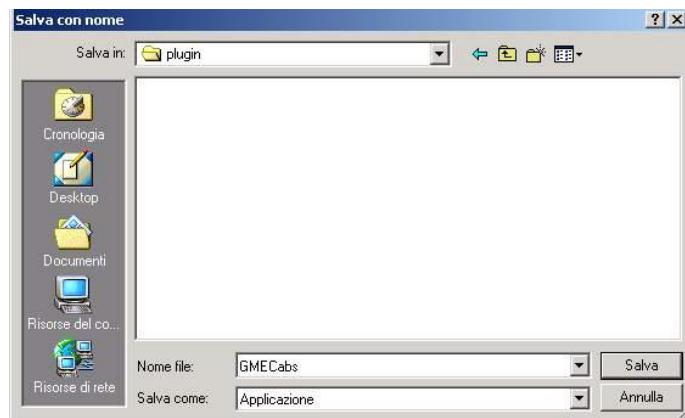

Figure 4: saving of installation file

After saving the file, open an MS-DOS prompt window. On Windows **Start** menu, click on **Run** and enter **cmd**.

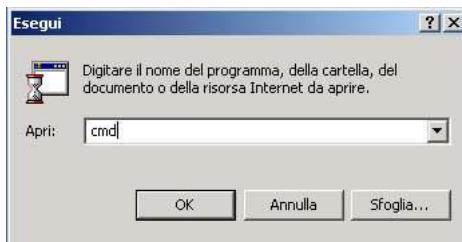

Figure 5: launching of MS-DOS window

Now, go to the directory where you have saved the installation file (e.g. **c:\plugin**) and enter **cd c:\plugin**.

Figure 6: access to the installation file directory

After entering into the **c:\plugin** directory, run the **GMECabs.exe** file, by entering **GMECabs.exe**, as shown in Figure 7.

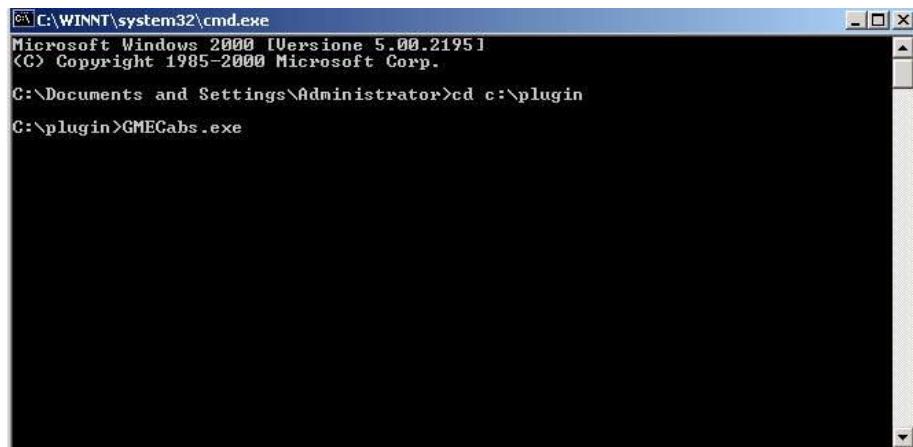

Figure 7: running of GMECabs.exe.

Then, confirm the directory where the files will be extracted (e.g. **c:\plugin**).

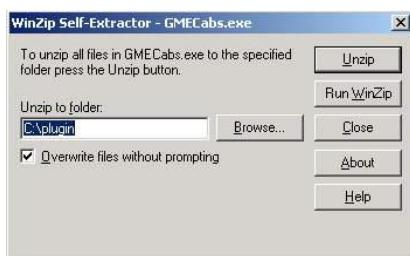

Figure 8: directory where the files will be extracted

Finally, access the **GMECabs** subdirectory by entering the **cd GMECabs** command and run the **.bat** file as shown in Figure 8 and 9.

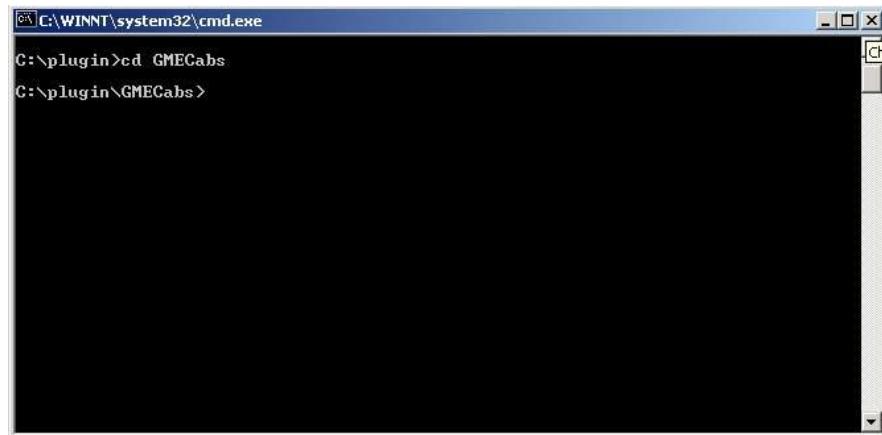

Figure 9: access to the GMECabs directory

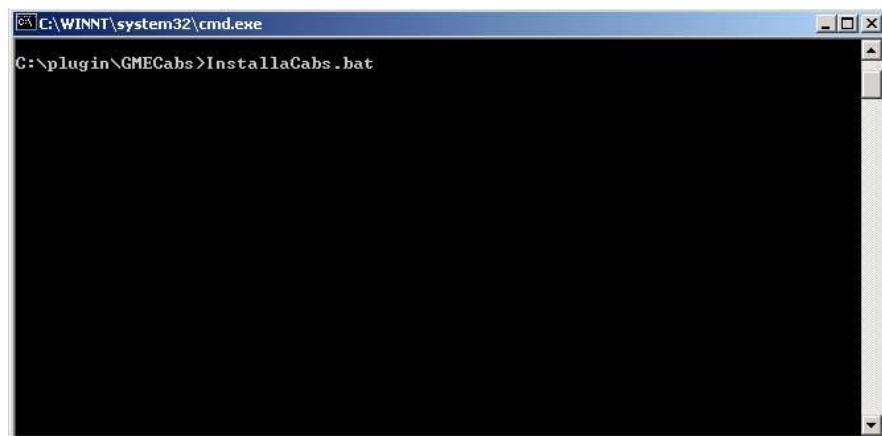

Figure 10: running of the .bat file.

Now, you may register with the system with your own certificate.

ADDITION OF A NEW SIGNATURE CERTIFICATE

By clicking on [gestione firma \(signature management\)](#), you access a page on which you may manage your signature certificate. If you have no signature certificate, the page will be as shown in Figure 11: through the **Aggiungi** (add) link, you may add a certificate.

Aggiungi

Figure 11: the user has no signature certificate but may add one on this page

By clicking on **Aggiungi** (add), you may select the certificate that you wish to use (to sign the transactions to be entered into the system) among the ones installed in your computer. See Figure 12.

Figure 12: entry of new certificate

After selecting the certificate, its details will be shown on the page. At this stage, you have to confirm the entry of the certificate, by clicking on **Salva** (save).

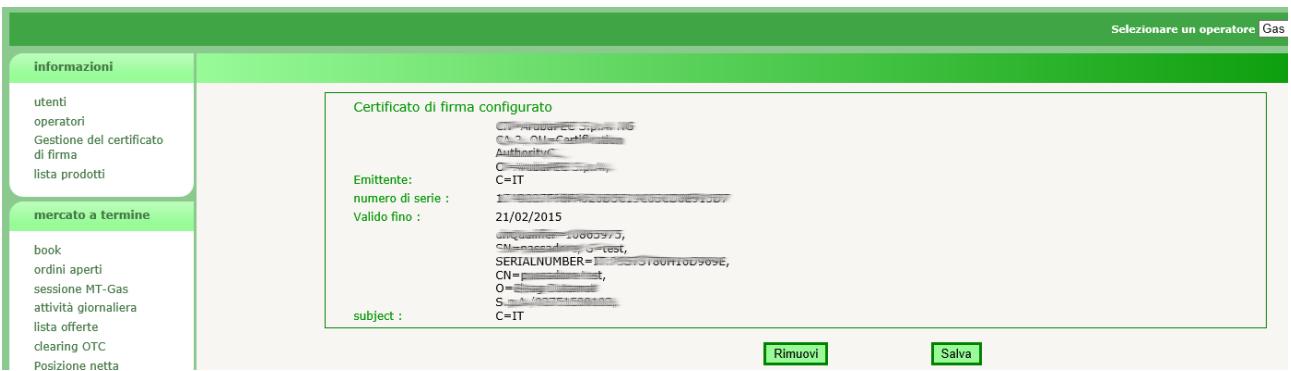

Figure 13: details of the certificate being entered

After entry, the certificate must be authorised by the portal administrator in order to be used in the transactions.

HOME PAGE

Figure 14 displays the home page of the portal with the numbers of its four main sections, which are always available whatever the page opened by the user.

USER DETAILS AND LOGOUT

Section (1) shows the name of the authenticated user and his/her role (**user**, **viewer**, **MT-GAS user or M-GAS user**). A drop-down menu, placed immediately beside the name, will permit you to select the language in which the content of the portal will be displayed. The content of the pages will be available in the selected language. By changing the language, you will be able not only change the textual parts, but also the date format, in Italian (*it-IT*) or English (*en-GB*), and the decimal separator for figures: comma (",") for Italian and point (".") for English.

By clicking on the  icon on the right side of the screen, you may quit the portal, closing the session. If you wish to access the portal again, you have to authenticate yourself again.

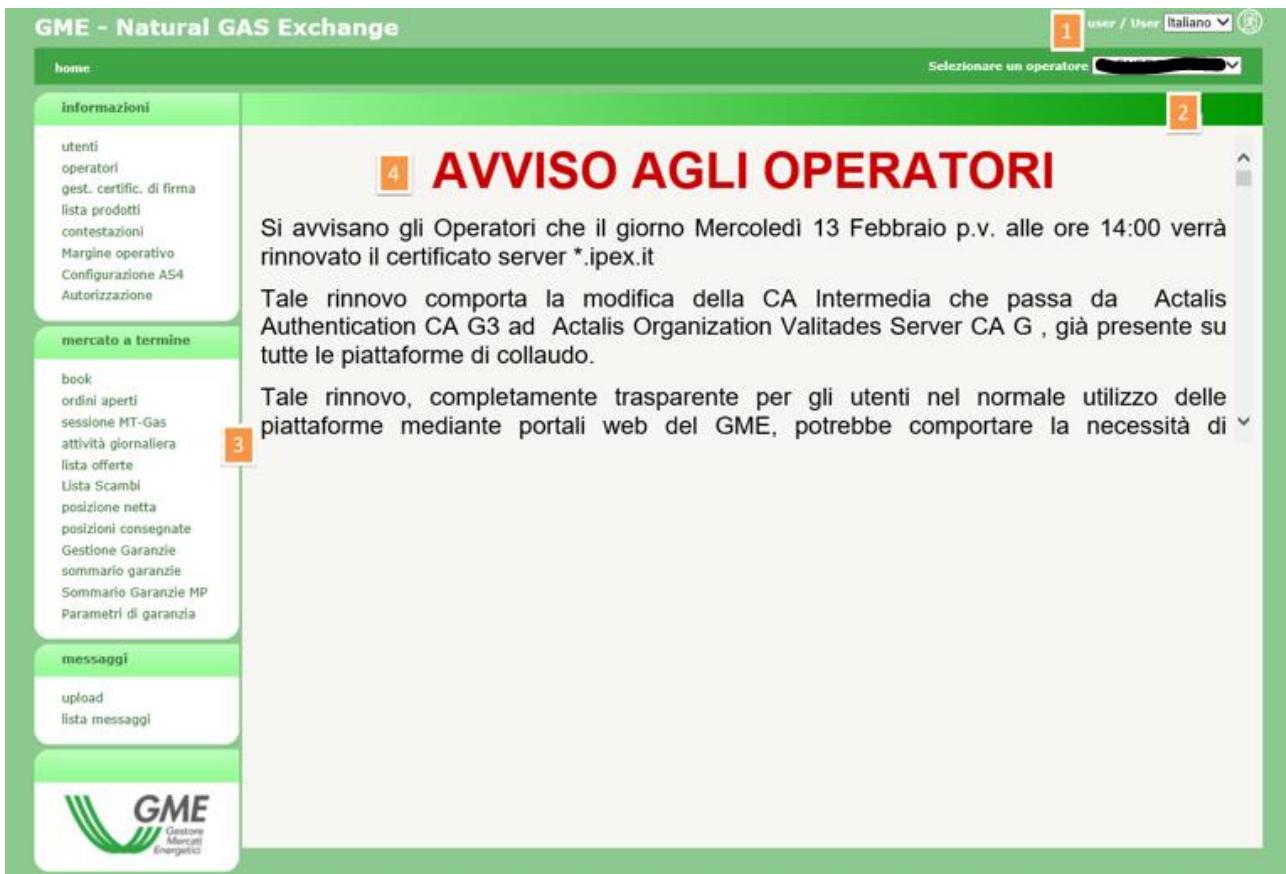

Figure 14: home page of the portal

AUTHORISED PARTICIPANTS

Section (2) gives access to a drop-down menu with all the participants authorised to operate in the M-GAS and represented by the current user. The transactions that the user carries out on the portal, e.g. entry of bids/offers, are associated with the participant selected on that menu.

MENU

Section (3) is a menu with the link to all the pages that the user may reach. The **data** section gathers all the pages with useful information for users. The **forward market** section groups all the pages for bid/offer entry and monitoring, market session status and results, data on net positions and on the financial guarantee.

Finally, the **messages** section shows all the pages for uploading xml files and the list of input/output messages of the participants associated with the user.

MAIN CONTENT

The last section (4) shows the content of the pages. The home page of Figure 3 contains messages to participants.

FILTERS AND REPORTS

Before reviewing the pages of the portal, it is worth describing one feature that is common to all the pages showing a report.

The screenshot shows a green header bar with three icons in the top right corner. Below it is a search bar with dropdown menus for 'Periodo di vendita' (all) and 'data mercato' (19/07/2013). A 'product list' table follows, with columns: nome prodotto, Data inizio scambio, Data fine scambio, Data inizio vend, Data fine vendit, Periodo di vendita, Giorni di fc, prezzo di contro control Price C, abilitato (checkbox), and Id messaggi abili (checkbox). At the bottom right of the table is a small circular icon with a dot.

Figure 15: Filters and Excel reports

Each page with a report has a filter section, which is not usually shown when the page is opened. To show it, click on the icon of the top-right group. Conversely, to hide it, click on the icon. You will see the filter section where you may enter values to restrict the number of results shown by the underlying report. To download the report taking into account the appropriate filters, click on . Finally, you may export the report in Excel format by clicking on . After clicking on the latter icon, the page will prompt you to save the report in Excel format, showing all the results (obviously without the paging of results appearing on the web page).

For practical purposes, some filters are shown on the columns. Figure 15 (next-to-the-last column “abilitato” – authorised) contains a filter showing all the possible values. After changing the filter, refresh is automatic.

The screenshot shows a green header bar with 'GME - Natural GAS Exchange' and a user dropdown. Below is a breadcrumb 'home > informazioni > operatori' and a dropdown 'Selezionare un operatore' set to 'ENERGIA S.p.A.'. On the left is a sidebar with 'informazioni' and 'mercato a termine' sections. The main area shows a table titled 'operatori' with columns: 'ragione soc.' and 'cod. operatore'. The table lists various companies with their corresponding codes:

ragione soc.	cod. operatore
Royalties EDISON SPA	r00008
Royalties ENI S.p.A.	r00118
Royalties SHELL ITALIA E&P SPA	r50035
Royalties SOCIETA' ADRIATICA IDROCARBURI	r50010
ZZ Royalties SOCIETA' ADRIATICA IDROCARBURI	r90109
ZZ Royalties SOCIETA' IONICA GAS SPA	r90108
2B ENERGIA S.p.A.	00041
2V ENERGY SRL	00198
50 Hertz SRL	50076
A2A S.p.A.	00267
ACEA Energia SPA	00275
ACPA PININFARINA S.p.A.	50045

Figure 16: list of participants authorised to operate on the platform

PARTICIPANTS' PAGE

The [participants'](#) page displays the list of participants authorised to operate in the M-GAS. This is a read-only page and only shows the registered name and the code of the participant.

USERS' PAGE

The [users'](#) page is another read-only page displaying all the users authorised to operate on behalf of the participant selected on the top-right drop-down menu.

Figure 17: users' page

The data in the table are as follows: user name, name and surname of the user, his/her role, data on the authentication and signature certificate, the participant on behalf on which/whom the user is authorised to operate (i.e. the current participant) and the specification of whether the user is authorised or not.

LIST OF PRODUCTS

The next page to be described is the one with the [list of products](#). It is a report with the products created on the platform. Only the products being traded on today's date will be shown by default. However, you may change the filter values, by accessing the hidden filter management window.

Figure 18: list of products

The displayed columns are as follows: product name, start and end dates of trading, start and end dates of delivery, selling period, supply days, check price, deviation from check price (percentage), specification of whether the product is enabled or not.

CLAIMS

Figure 19 shows the claims page through which you can monitor the progress of claims. Any claim can be inserted and then updated with new messages. You can see a list of all complaints made to a specific Participant, and in particular: The title of the claim, the status, the company's code (participant) to which the claim relates, the user who made the

claim, the time-stamp indicating the time of submission and then a link referred to: the messages associated with the selected claim. Possibility to add a new message to the open claim.

Figura 19: claims

By using the icon you may open the window to insert a claim, as shown in Figure 20.

ORDER BOOK

Now the [forward market section](#) will be described.

Figure 21 shows the [order book](#). Each row of the order book shows the products tradable at the time when the book is displayed. For each product, the system shows the best demand bids and supply orders, if any, and the details of their volumes (expressed in MW) and prices. The lower part of the order book shows the date and time of the latest order book update, which is periodical and automatic.

Giorno GAS	Prezzo Medio	Quantità Complessiva Movimentata	Prezzo Min. SRG	Prezzo Max. SRG
19/12/2019	0	0	0	0
20/12/2019	0	0	0	0
21/12/2019	20	120	0	0
22/12/2019	20	120	0	0

Figure 21: order book

In addition to the above, the page also contains a section dedicated to the price trend (updated with each new coupling). This section shows, for each product traded in M-GAS and for each product traded in MPL in an open session for the purpose of balancing, the following information:

- Average price: weighted average, calculated according to the quantities of gas, expressed in energy, of the prices of all bids/offers accepted, to be delivered on the gas day G, including transactions carried out by SRG.
- Total amount: total quantity, in absolute value, of the bids/offers accepted to be delivered on day G, expressed in MWh (no decimals accepted).
- Minimum SRG price: the lowest price among all the sales, concluded by SRG to be delivered on gas day G.
- Maximum SRG price: the highest price among all the purchases concluded by SRG, to be delivered on gas day G.

Figure 22: Price trend

To change the refresh time, click on the top-right  icon and enter the refresh time in seconds, as shown in Figure 23.

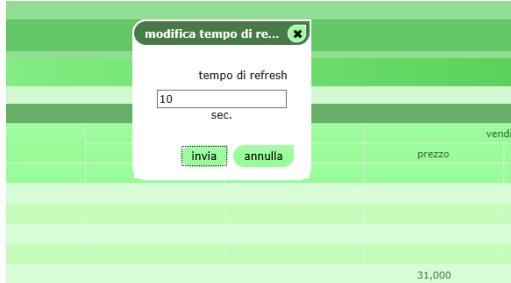

Figure 23: change of the refresh time

SUBMISSION OF BIDS/OFFERS

A user with **user** privileges (or with **MT-Gas user** or **MGP/MI-Gas user** privileges, but only for the applicable products) may submit bids/offers by interacting with the order book in various modes, which give rise to the opening of a pop-up window with all the fields needed to submit a bid/offer (Figure 24).

In the first mode, the user clicks on the  icon. He/she will get a pop-up window only with the pre-compiled fields pertaining to the selected mode and date of expiration.

You may click on the name of the product to open a pop-up window for entering a bid/offer for the selected product.

The screenshot shows a green-themed pop-up window titled 'Nuova Offerta (MT) - Internet Explorer'. The window contains a form for entering a bid or offer. The fields include:

- operatore:** MyOperator2
- tipo di offerta:** acquisto (selected)
- prodotto:** MGP-2017-11-16
- data mercato:** 15/11/2017
- modalità:** Normale
- quantità:** 1
- prezzo:** 17,000 €/MWh
- senza indicazione di prezzo:**
- fino a cancl.**: 15/11/2017
- controvalore:** 408,00 €
- quantità MWh/giorno:** 24,00 MWh/g
- volume:** 24,00 MWh

At the bottom are three buttons: **calcola**, **annulla**, and **firma e invia**. Below the buttons is the text **Gme S.p.a.**

Figure 24: bid/offer entry pop-up window

Finally, you may click on the cell with the buying or selling price. This causes the opening of a pop-up window with the preselected product name and type of bid/offer (the type of bid/offer is opposite the one of the cell on which you have clicked; therefore, if you have clicked on the cell with the buying price, the preselected type of purchase will be sale).

The submitted amount shall be expressed in MW. If the cell already shows a price (i.e. there is already a bid/offer in the order book), the pop-up window captures the price and volume and shows them in the respective input fields. However, you may change the values before submitting the bid/offer.

Among the editable fields of the order entry pop-up window, you may note the one concerning the mode of entry of the bid/offer: **normal**, **execute and cancel** and **execute or cancel**. In the **execute and cancel** mode, the bid/offer is shown in the order book, marched for the matchable volume and them removed from the order book. If there are no bids/offers of opposite sign, the bid/offer will remain in the order book until it is matched in full or in part. After the matching, it is removed.

In the **execute or cancel** mode, the bid/offer is totally matched; if, upon the presentation in the order book, this is not possible, the bid/offer is removed.

The unlimited price checkbox makes it possible to match the bid/offer with all the bids/offers available in the order book (for the product under review) but only for the matchable volume.

The expiration date makes it possible to specify the market date until which the offer must be presented in the order book. After the date has expired, the bid/offer is automatically revoked.

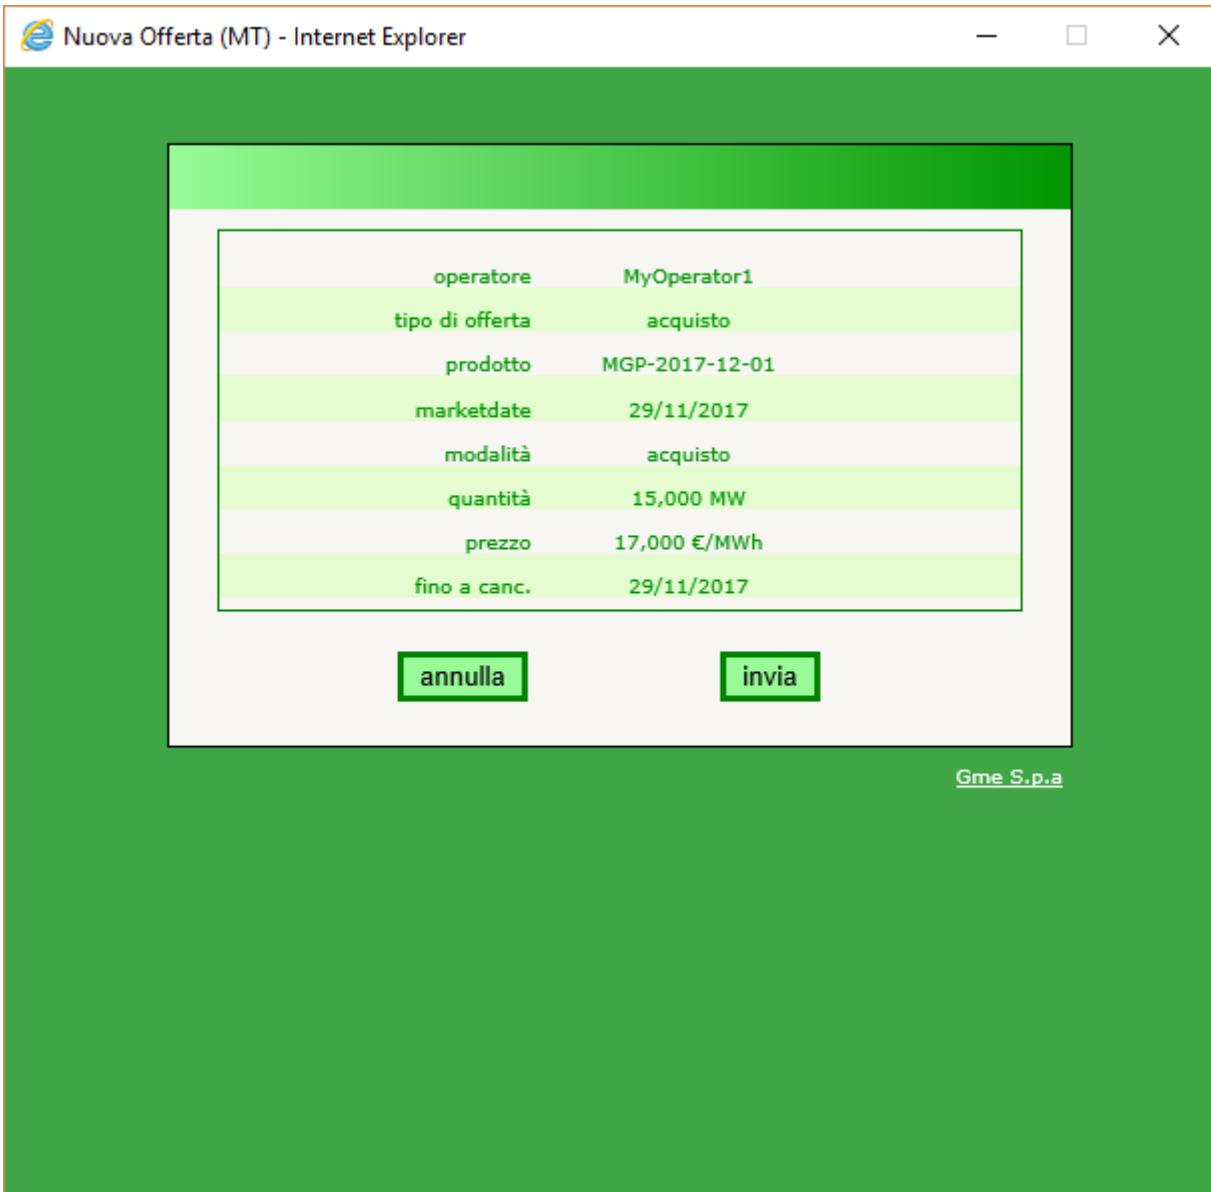

Figure 25: signature preview

By clicking on the **firma e invia** (send and sign) button, you may get a preview, which also represents the digitally signed document.

By clicking on **invia** (send), you will enter the bid/offer into the system and you may download the FA by clicking on the **Carica FA** (load FA) button.

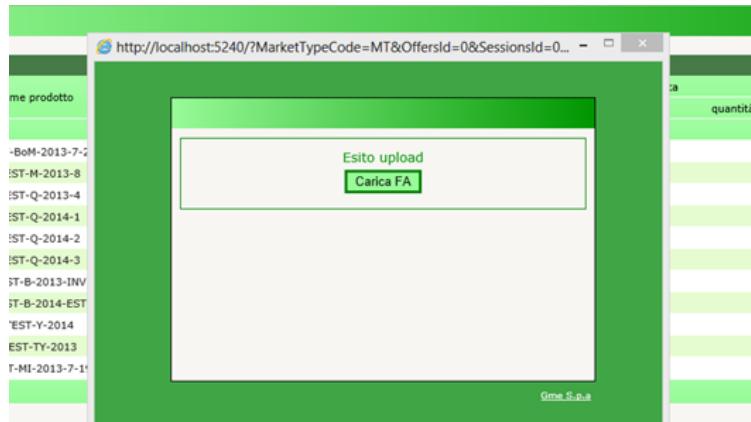

Figure 26: loading of the FA

After the system has processed the bid/offer, it will show the link of Figure 21. The data specified between brackets refer to the number of successful transactions. In the example, one of one, i.e. [1/1].

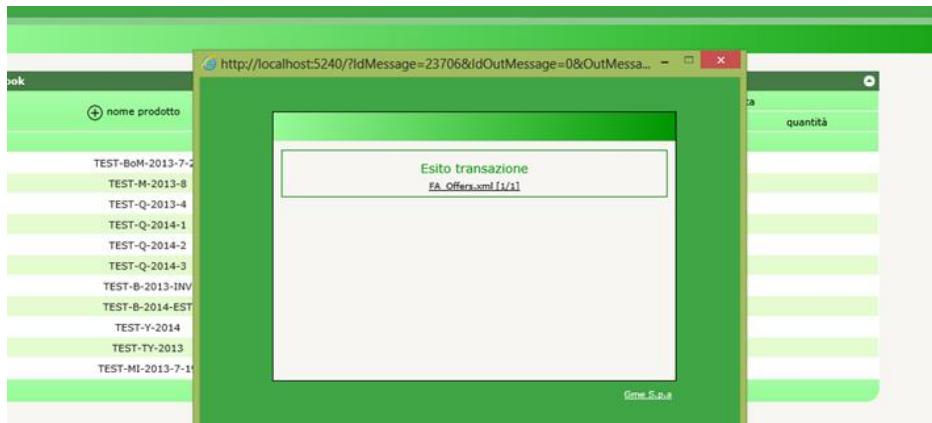

Figure 27: transaction result

CHANGE OF BIDS/OFFERS

You may change the details and status of one of your bids/offers in the period in which the market session is open for trading.

To do so, go to the [ordini aperti](#) (open orders) page shown in Figure 28.

Figure 28: open orders page

The columns of the table show the product name, the submitted volume (expressed in MW), the type of bid/offer, the submitted price, the total value, the date of submission, the participant's code, the status of the bid/offer, its expiration, the possible OTC counterparty and the mode of submission (**normale**, **esegui e cancella**, **esegui o cancella** – normal, execute and cancel, execute or cancel).

The screenshot shows a web-based application window titled "modifica offerta (MT) - Internet Explorer". The form contains the following fields:

- operatore:** MyOperator2
- tipo di offerta:** vendita
- prodotto:** MGP-2017-11-18
- data mercato:** 15/11/2017
- modalità:** Normale
- quantità:** 100 MW
- prezzo:** 17,000 €/MWh
- senza indicazione di prezzo:**
- Valida fino alla sessione del:** 16/11/2017
- NB: la sessione si chiude alle ore 3.00 del giorno successivo a quello sopra indicato**
- calcola** button
- annulla** button
- firma e invia** button

At the bottom right of the window, there is a link: [Gme S.p.a.](#)

Figure 29: change of a bid/offer

Clicking on one row of the table will open a pop-up window similar to the bid/offer entry one. On this window, you may change the details of the bid/offer, e.g. its price and volume.

Conversely, by clicking on the checkbox in the first column (select the **tutti** (all) checkbox to select all the visible rows), you may change the status of the selected bids/offers, pushing the three buttons underlying the table. By pressing **Nascondi** (hide), you may temporarily hide a bid/offer, so that it will no longer be visible in the order book and thus no longer matchable.

The **Mostra** (display) button makes hidden bids/offers visible, so that they will reappear in the order book. The **Ritira** (withdraw) button will definitively revoke a bid/offer.

Figure 30: status change procedure

After pressing one of the three buttons, a pop-up window will show a summary of the transactions being entered. By clicking on **firma e invia** (sign and send), you may sign the form and then wait for the result, as shown in Figures 26 and 27.

After changing a bid/offer or its status, the bid/offer loses its time priority with respect to the other bids/offers already present in the order book. Therefore, price remaining equal, a bid/offer that has been changed or whose status has been changed will be the one with the lowest priority among those present in the order book upon the change.

ORDER BOOK DETAILS

Going back to the [order book](#), you will see the statistical details of the products and bids/offers that have been matched by clicking on the icon and displaying the form of Figure 31.

- CLOS: closed and confirmed.

DAILY ACTIVITY

The [attività giornaliera](#) (daily activity, Figure 34) page shows all the activity of a single participant in terms of movements in the order book: product name, submitted volume (expressed in MWh/day), type of bid/offer, submitted price, total value, participant's code, bid/offer status, timestamp, possible code of the OTC counterparty, bid/offer mode, user that has carried out the transaction, total volume (expressed in MWh/day), transaction carried out, unique id of the bid/offer, possible matching id and possible error code, if the bid/offer has been rejected (by placing the pointer of the mouse on the code, you will see a tooltip with a descriptive text of the error).

The screenshot shows a table titled 'attività giornaliera' (daily activity) with the following columns:

id off.	id submiss.	error	utente	modalità	controparte C	timestamp	prezzo	volume MWh	tip. oper.	nome prodotto	q.tà MWh/g
	762366		emanuele.matt	Normale		15/11/2017 11:39:1	17,000	408,000	acquista	MGP-2017-1	24,000
	762366		emanuele.matt	Normale		15/11/2017 11:39:0	17,000	408,000	acquista	MGP-2017-1	24,000

Figure 34: daily activity

LIST OF BIDS/OFFERS

The [lista offerte](#) (bids/offers page, Figure 35) lists the bids/offers for the selected participant.

The screenshot shows a table titled 'lista offerte' (list of bids/offers) with the following columns:

utente	q.tà res. MWh/g	tip. off.	prezzo	data	id.	status	scadenza	controparte C	modalità	pr. acc.	nome prodotto	q.tà MWh/g
emanuele.matt	0	non fittizio	17,000	15/11/2017 1	MGP-2017-11-16	acquistata	16/11/2017 00:00	MyOperator2	Normale	0	MGP-2017-11-16	24,000
emanuele.matt	0	non fittizio	17,000	15/11/2017 1	MGP-2017-11-16	venduta	16/11/2017 00:00	MyOperator2	Normale	0	MGP-2017-11-16	48,000
emanuele.matt	0	non fittizio	17,000	15/11/2017 1	MGP-2017-11-16	abbinata	16/11/2017 00:00	MyOperator1	Normale	0	MGP-2017-11-16	24,000

Figure 35: list of bids/offers

The page shows details such as: product name, submitted volume (expressed in MWh/day), type of bid/offer, submitted price, value, date of submission, participant's code, bid/offer status, date of expiration, possible OTC counterparty, bid/offer mode, user that has managed the bid/offer, the possible accepted price, the remaining volume (expressed in MWh/day) and the specification of whether the bid/offer is real or fictitious. A real (non-fictitious) bid/offer is instead generated by the system when a product undergoes cascading and the participant has matched bids/offers for that product.

NET POSITION

The **posizione netta** (net position) page of Figure 36 displays the net positions (expressed in MWh/day) for matched orders pertaining to the products being traded.

Figure 36: net position

Products whose net position is zero are not displayed.

NET DELIVERY POSITION

The [posizioni consegnate](#)(net delivery position) page shows the net position (expressed in MWh/day) to be delivered to SNAM Rete Gas, only for the MGP and MI products. This net position considers both real matchings and those arising from the cascading mechanism.

Figure 37: net delivery position

The displayed data are as follows: unique code of the net position delivered to SNAM Rete Gas, participant's code, participant's registered name, flow date pertaining to the delivery, volume delivered (expressed in MWh/day), possible volume rejected by SNAM Rete Gas (expressed in MWh/day), specification of whether SNAM Rete Gas has already confirmed or not confirmed the net position delivered and the name of the reference product.

GUARANTEE MANAGEMENT

On the [gestione garanzie](#)(guarantee management) page, you may view the situation of the financial guarantees relating to the forward gas market (MT) for the participants that you represent.

The first report shows data such as the code and registered name of the participant, the initial amount of the financial guarantee and the last date of payment and the last paid date.

By clicking on  you will open the underlying report, with details about the financial guarantees and the credit/debit adjustments.

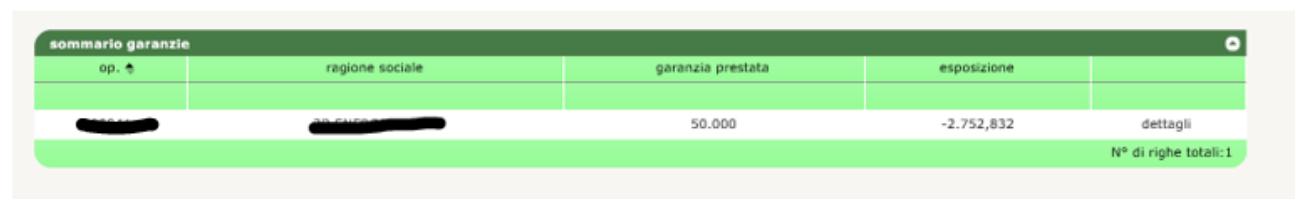

The screenshot shows a web-based application for managing financial guarantees. At the top, there is a summary table with columns: op. (operator), ragione sociale (legal name), garanzia prestata (amount provided), ultima data in pagamento (last payment date), ultima data pagata (last paid date), and garanzia disponibile (available guarantee). Below this, a detailed table titled 'mkipDetail' lists specific movements: 783384 (Financial Guarantee, 50.000, Deposito, MT-GAS, valid until 18/12/2019), 783385 (Adjustment, -500, MT-GAS, valid until 18/12/2019), and 783386 (Adjustment, 7.000, MT-GAS, valid until 17/12/2019). The bottom of the screen includes navigation links (first, previous, next, last), a page number (Pagina: 1), a total pages count (N° totale pagine: 1), a rows per page selector (110), and a note indicating rows 1 to 3 of a total of 3. A green button labeled 'Chiudi dettagli' (Close details) is also visible.

Figure 38: deposit management

By checking the **show closed guarantees** box, you may view possible closed financial guarantees and credit/debit adjustments.

SUMMARY OF GUARANTEES

On the [summary of guarantees](#) page, you may view the status of the financial guarantees intended for the forward market (MT) of the participants that the user represents (Figure 39). For each participant, the page shows the code, the registered name, the original amount of the guarantee and the financial exposure.

The screenshot shows a summary table for financial guarantees. It includes columns for 'sommario garanzie', 'op.' (operator), 'ragione sociale' (legal name), 'garanzia prestata' (amount provided), 'esposizione' (exposure), and 'dettagli' (details). The data row shows a participant with code '2B-ENERGIA S.P.A.', amount '50.000', exposure '-2.752,832', and a 'dettagli' link. A note at the bottom indicates 'N° di righe totali: 1'.

Figure 39: summary of MT guarantees

If, instead, you click on **dettagli** (details), you will get a pop-up window with the details of the financial guarantee formulas, where you may identify all the components and the related amount (Figure 40).

Figure 40: details of MT financial guarantee

The tick **visualizza garanzie chiuse** (displays closed guarantees) allows you to view any closed deposits and credit/debit adjustments.

SUMMARY OF MP GUARANTEES

The page “**Sommario garanzie MP**” (Summary of MP Guarantees) page allows you to view the status of the financial guarantees for the MP spot market of participants that you represent (41). For each participant selected from the drop-down menu there are:

- in the section “Sommario garanzie MP” (Summary of MP Guarantees) the initial guarantee (the amount of valid guarantees registered on the Netting platform, reduced by the Maintenance Margin of 3%); Guarantee Capacity (the difference between Initial Guarantee and Exposure); the Exposure (the exposure determined by all the positions held on all the platforms whose guarantee pertains to Netting);
- in the section “Dettaglio Garanzie” (Guarantees Detail) all the deposits and bank guarantees relating to the centralized Netting guarantee system and the credit and debit adjustment of the MP spot gas market;
- in the section “Esposizione per data di settelemento” (Exposure by Settlement Date), all exposures divided by settlement date determined by all the positions held on all the platforms whose guarantee pertains to Netting, and the valid credits of the MP spot gas market only.

Figure 43: guarantee parameters

XML FILE UPLOAD

Through the [upload](#) (upload) page, you may directly upload the xml file for submitting/changing bids/offers or changing their status (Figure 42).

The screenshot shows a web-based file upload interface. At the top, there is a header bar with the word "upload" on the left and a dropdown menu "Selezionare un operatore" containing "Gas Demo S.p.A." on the right. Below the header, there is a large input field with a placeholder "Seleziona un file da caricare" (Select a file to upload). To the right of this input field is a green button labeled "Upload file". A small tooltip or status message "re\Desktop\Offers (2).xml | Sfoglia..." is visible above the input field.

Figure 44: xml file upload

You must write the xml file with an appropriate editor and then upload it by selecting the file, signing its content and submitting the transaction.

LIST OF MESSAGES

Each action that you make in the M-GAS system through the above-described web pages will result into an xml file, which is stored into the database and then processed by the platform. Each action stored into the system will produce a result (called **Functional Acknowledgment, FA**); whatever the outcome of the action made, the FA will be a file in xml format.

The [lista messaggi](#) (list of messages) provides all the xml transactions made and the related outcomes.

The screenshot shows a table titled "lista messaggi" with columns: Id messaggio, Id messaggio out, Contenuto, Oggetto del messaggio, Stato del messaggio, op., codice utente, Nome file, Timestamp, Transazione, and elab. time. A search bar and filter icons are at the top right. A message box at the bottom says "Righe da 1 a 12 - N° di righe totali:12".

Figure 45: list of messages

The page is organised as follows: the first column shows the unique id assigned to the input xml message, produced through your interaction with the portal pages. By clicking on the number representing the id, you may download the xml file showing all the input parameters that have originated the transaction.

Likewise, the second column shows the id of the transaction outcome file. By clicking on the number, you may download the FA in xml format. Conversely, the third column shows the link to the digitally signed content, i.e. the portion of HTML code representing the preview of each action, which is presented immediately before the action.

Then, you will see the object of the message and, above all, its status; the status may be as follows:

- **IN**: message submitted and stored but not yet processed.
- **ERR**: message incorrectly formed or with incorrect content.
- **RUN**: message being processed.
- **OUT**: message processed (successfully or unsuccessfully).

The remaining columns show such data as the participant and user that have submitted the transaction, the name of the xml file, the date and time of submission, the number of successfully processed transactions and the processing time in minutes and seconds.

Among the page filters, you will find a checkbox called **mark** (Figure 44). If you select the box, the system will mark the outcome file as downloaded. This action will have an impact on the download of the file through the web service, because the system will ignore the already downloaded files and return only the ones that you have not yet examined. If you download an xml file from the interface with the **mark** checkbox selected, you will not be able to download the same file through the web service.

The screenshot shows a table titled "lista messaggi" with columns: Id messaggio, Id messaggio out, Contenuto, Oggetto del messaggio, Stato del messaggio, op., codice utente, Nome file, Timestamp, Transazione, and elab. time. A search bar and filter icons are at the top right. A message box at the bottom says "Righe da 1 a 2 - N° di righe totali:2".

lista messaggi										
Id messaggio	Id messaggio out	Contenuto	Oggetto del messaggio	Stato del messaggio	op.	codice utente	Nome file	Timestamp	Transazione	elab. time
23771	64718	Visualizza	Offers	OUT	00123GT	root	Offers.xml	22/07/2013 02.43.28	1 \ 1	00.01
23742	64685	Visualizza	Offers	OUT	00123GT	demo.user	Offers.xml	22/07/2013 10.54.29	1 \ 1	00.00

Figure 46: filters of the list of messages

You have seen that any action (xml input transaction) corresponds to an xml outcome file (FA). In the [lista messaggi](#) (list of messages), you may also view outcome files different from FAs, which do not correspond to any input file.

Figure 42 (third row) shows a **Bid Notification (BN)** file with the outcome of the matching of one of the participant's bids/offers.

Another file of this type is the **Delivery Notification (DN)**; this file is generated upon confirmation of the delivery to SNAM Rete Gas and contains the outcome of the delivery, the possible undelivered volume and the reason for the failed delivery.

THE FEATURES OFFERED BY THE PORTAL MGS

THE HOMEPAGE

Figure shows the main page of the portal. Here four main always available areas are numbered whatever the User open page.

USER DETAILS AND LOGOUT

The area (1) shows the authenticated User name and his/her role (**User or viewer**). By clicking [Logout](#), you can leave the portal, closing the session. Now the User must re-authenticate if he/she wants to access the portal.

Figure 7: the main page of the portal

THE ALLOWED PARTICIPANTS

(2) displays a drop down menu containing all Participants authorized to operate on the MGS, the current User's competence. The operations that the User performs on the portal, such as the submission of offers/bids, are associated with the selected Participant in that menu.

THE MENU

Section (3) shows the menu that contains the links to all the pages that the User can achieve. There is an **information** section where all the pages bearing information useful to the Users are grouped. **MGS** section contains the pages for the submission and monitoring of the offers/bids, status and results of the market sessions and pages showing the management of deposits and the summary of the participants' guarantees.

Finally, the **messages** section shows the pages to upload xml file and the list of input and output messages of competence of those participants associated to the User.

THE MULTILINGUAL SUPPORT

Last section, which is the (4), contains the two [eng](#) and [ita](#) links, where the User can select his/her default language. The content of the pages will be translated on the basis of the selected language. Besides the translation of text parts, changing the language also involves displaying the date in Italian (it-IT) or English (en-GB) format and the decimal separator for the figures: the comma (",") for Italian and the dot (".") for English.

FILTERS AND REPORTS

Before you scroll through the pages of the portal, it is necessary to explain a common feature to all the pages that show a report.

Figure 48: filters and reports in Excel.

Each report page has a filters section that usually is not shown when the page is opened. To show it, you must click the link ([Show filters...](#)) on the right. Conversely, to hide it, click ([Hide filters ...](#)). The one that appears is the filter section in which, in general, you can enter values that aim to restrict the number of results provided by the underlying report. To recharge the report taking account of appropriate filters, it is necessary to click [refresh](#), at the top left..

Finally, you can export the report to Excel format by clicking [export](#). After clicking, the page asks you to save the report in Excel format, bringing all the results, obviously without pagination of them like it happens on the web page.

Figure 49: the list of Participants entitled to the platform.

THE PAGE OF PARTICIPANTS

[Participants](#) page shows the list of Participants authorized to operate on the MGS. This page is read-only and contains information regarding the business name and the Participant code.

By clicking [export](#), you can export the complete list of Participants to Excel.

THE USERS PAGE

The [Users](#) is another read-only page that allows you to view all the Users entitled to act on behalf of the Participant selected in the dropdown menu at the top right.

Figure 50: the Users page.

The information in the table shows, respectively, the Username, the name and surname of the User, the User's role, the information on the authentication and signature certificate, the Participant for which they are authorized to operate (i.e. the current Participant) and an indication of whether the User is enabled or not. Clicking on [\(Show filters...\)](#), you can access the area of the page containing the filters. In the event of the User list, there is only one **Search** field where you can enter a text which will be searched in the User code, name and surname.

ADDING A NEW SIGNATURE CERTIFICATE

Through the signature management link, you can access the page that offers users the possibility to manage their signature certificate. If the user does not have a signature certificate, the page looks like in Figure 11; the link “**Aggiungi**” (Add) allows the user to add a certificate.

Figure 49: the user does not have a signing certificate. The page allows you to add one.

By clicking on the link “**Aggiungi**” (Add), you can choose, among the certificates installed on the user's computer, what you wish to use to sign the transactions being uploaded on the system, as shown in Figure 12.

Figure 11: insertion of a new certificate.

Once the certificate is selected, its details are shown on the page. At this point, the user must confirm the insertion of the certificate by clicking on the link “**Salva**” (Save) link.

The screenshot shows the GME (Gestore Mercato Elettrico) Natural Gas Exchange portal. The left sidebar includes links for home, informazioni operatori, utenti, gestione firma, margini, contestazioni, Configurazione AS4, MGS, invio offerte, offerte, sessioni, gestione depositi, Sommario Garanzie MP, calendario pagamenti, Risultato invii verso SNAM, messaggi, upload, and lista messaggi. The main content area displays the "Gestione del certificato di firma" section, showing certificate details: Issuer: C=IT, CN=ArubaPEC S.p.A., NG CA 3, O=ArubaPEC S.p.A., OU=Certification Authority; Serial Number: 5AD674824D8D1FA810ADA24766513D19; Data fine validità: 26/07/2020; Subject: dnQualifier=17169211, SN=test, G=ciccio, SERIALNUMBER=IT:TSTCCC80A01D969W, CN=test ciccio, O=non presente, C=IT. Below this, there are "Rimuovi" and "Salva" buttons, and a link to "Maggiori informazioni sul componente di firma". The top right shows the operator's name and a "user / user Chiusura sessione" link.

Figure 52: the details of the certificate are being inserted.

Once the certificate has been inserted, before it can be used in transactions, it must be authorized by the portal administrator.

MARGINS

Continuing with the series of pages, you find the [report on margins](#). It's a report showing the **maximum down margins** (purchase) and the **up ones** (sales) for all Participants associated to the User. These margins are reported by SNAM Rete Gas. Margins divided by **Storage Participant** and **flow data** are displayed.

The screenshot shows the GME Natural Gas Exchange portal. The left sidebar includes links for home, informazioni operatori, utenti, gestione firma, margini, contestazioni, Configurazione AS4, MGS, invio offerte, offerte, sessioni, gestione depositi, Sommario Garanzie MP, calendario pagamenti, Risultato invii verso SNAM, messaggi, upload, and lista messaggi. The main content area displays the "margini" section, showing a table of flow data from 19/12/2018 to 19/12/2019. The table columns include: op., data Russo, min vendita MWh, max vendita MWh, min acquisto MWh, max acquisto MWh, qtà presentata vendita MWh, qtà presentata acquisto MWh, and op. stoccaggio. The rows show various data points for different storage participants. The bottom of the table shows navigation links: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, ..., Last.

Figure 53: the report on margins.

Together with the margins, also the information on the **volumes submitted for sale and purchase** is displayed. Quantities are colored differently depending on whether or not they violated the margins: black if it is within the maximum margin, red if it exceeds the maximum margin.

Figure shows the filters with which you can filter the table below. You can specify a range of dates, so if you specify a period comprising more days (i.e. more flow dates), the table will consist of several items: a row for each <date, Participant, storage Participant>. If you view a flow date that involves no margins, you will see a blank line, possibly with the volumes already submitted by the Participant. You can also filter by the storage Participant.

As soon as the system receives the information on margins for a given flow date, it is made available on this report and consequently the volumes already submitted are marked with the appropriate color.

COMPLAINTS

Figure shows the page of the complaints through which you can monitor the progress of the claims. Any complaint can be inserted and then updated by associating new messages. You can see the list of all the complaints made by Participant, in particular: The title of the complaint, the state, the company code (Participant) which the complaint relates, the User who submitted the complaint, the timestamp indicating the time of submission and then a link relating to the possibility of adding a new message to the complaint already open.

contestazioni					
titolo	stato	cod. operatore	utente	timestamp	Piattaforma
contestazione del 19/12/2019	In attesa	00041	user	19/12/2019 10:49:28	Mercati di bilanciamento nuovo messaggio

Figure 54: complaint

Selecting the 'Open complaint' link, you can then open the window to add a complaint, as shown in Figure 51.

Figure 55: entering complaints

SUBMISSION OF BIDS/OFFERS

Let us now examine the pages of the [MGS](#) section. The most important page is undoubtedly the [offers/bids submission](#) page. Every transaction made through this page refers to the Participant selected in the upper right.

The screenshot shows the GME Natural Gas Exchange interface for submitting offers/bids. At the top, there are navigation links for 'eng ita' and the GME logo. Below that is the main title 'Natural Gas Exchange'. On the left, a sidebar menu includes 'home', 'informazioni operatori utenti gestione firma margini contestazioni Configurazione A54', 'MGS invio offerte', 'messaggi upload lista messaggi', and 'user / user Chiusura sessione'. The main content area has a yellow header bar with fields for 'Mercato: mercato di bil.' (set to 'mercato di bil.') and 'Data di flusso: 19/12/2015'. Below this is a table with 10 rows, each representing a storage participant's offer/bid. Each row has two columns: 'Tipo di offerta Prezzo [€/MWh]' and 'Quantità [MWh/Giorno]'. The first row shows 'Vendita 10.5' and '100'. The other rows show various price and quantity values. At the bottom right of the table is a button labeled 'Firma ed invia'.

Figure 56: the offers/bids submission page.

The page is organized as follows: at the top there are two pull-down menus: one for the market (currently only the MBS) and the most significant drop-down menu with the flow dates corresponding to the open market sessions. After selecting a date of flow, all the transactions available on the page will refer to that date of flow.

The **Participant code** field allows the Participant to designate a text note which will be applied to all offers/bids submitted to the system.

Further down there are two tabs. They refer to the storage Participant and further distinguish up (sales) and down (sale) offers/bids. In general for each Storage Participant enabled, there will be a pair of tabs.

Just above the tab there are three links:

- [Clean up form](#): you can clean up the text boxes of all tabs, deleting any numerical values that are displayed.
- [Upload submitted offers/bids](#): it allows you to view in the text boxes the offers/bids already submitted by that flow date.
- [Sign and send](#): it allows you to proceed with the bid/offer submission, as shown later.

Each tab contains some useful information: the information is the **minimum and maximum total volume** allowed for that storage Participant and type of offer/bid (sale or purchase). These volumes are in practice the margins reported by SNAM Rete Gas. As for the report on margins, this information is made visible immediately on receipt of the communication with the margins for each Participant. Next to these values, it is also displayed the **remaining volume**, in accordance with the maximum margin.

Further down, it's displayed the [empty tab](#) link. It is used to clean up the text fields of the tab only, leaving intact those of the other tab. The **Replace** checkbox indicates that the first offer/bid specified below will replace the first offer/bid that is already on the system (with respect to the tab context: the storage Participant and type of offer/bid).

[Load offers/bids](#) displays the bids/offers already submitted, but only for that tab. The other tabs remain unchanged.

Finally we see the ten bidding steps, each of which must specify the price and volume. It is not mandatory to specify each step, therefore, for each tab, you can also specify a single step.

By clicking [Sign and Send](#), the procedure for the signing and submission of bids/offers starts. If you specify offers/bids with prices that exceed the maximum or minimum threshold, it appears a page that requires further confirmation.

The screenshot shows a software interface with a yellow header bar containing the text "home > MGS > sottomissione offerte". On the right side of the header, there is a field labeled "Operatori:" followed by a redacted name. Below the header, there is a sidebar with links: "home", "informazioni operatori", "utenti", "gestione firma", and "MGS". The main content area contains a message in Italian: "Le seguenti offerte denotano un prezzo inferiore alla soglia minima o superiore alla soglia massima. Procedere comunque?". Below this message are two buttons: "Indietro" and "Continua". A table is present with columns: "Tipo di offerta", "Prezzo [€/MWh]", "Quantità [MWh/Giorno]", "Note", "StorageOperator", and "Azione". The table has one row with values: "Acquisto", "3", "9", "", "STOSGT", and "Inserisci".

Figure 57: prompting for a very low price.

Figure 57 shows an example of a purchase offer/bid at a price equal to **3 €/MWh**. This page requires confirmation ([next](#)) or allows to go [back](#) and make corrections. When you click [continue](#), you finally get to the offers/bids signature and submission page.

The screenshot shows a software interface with a yellow header bar containing the text "home > MGS > invio offerte". On the right side of the header, there is a field labeled "Operatori:" followed by a redacted name. Below the header, there is a sidebar with links: "home", "informazioni operatori", "utenti", "gestione firma", "margini", "contestazioni", "Configurazione AS4", and "MGS". The main content area contains a button "annulla" with a blue circular icon next to it, followed by the text "firma e invia". Below this is a table with the following data:

Mercato: mercato di bil. Data di flusso: 19/12/2019					
Tipo di offerta	Prezzo [€/MWh]	Quantità [MWh/Giorno]	Note	Operatore stoccaggio	Sostituzione
Vendita	10,5	100	00303	False	Inserisci
Vendita	20,789	10,8	00303	False	Inserisci
Vendita	5,876	1,876	00303	False	Inserisci

Figure 58: the phase of the content signature.

Figure 58 shows the essential data that characterize the offers/bids: type of offer/bid, unit price, volume, notes, the storage Participant associated to the bid/offer, indicating whether it is a replacement and the action. In this case it is always an action of the "**enter**" type. In general, you can also perform the action of **cancellation** and **change**. To perform these actions, you need to load in the tabs the offers/bids already submitted through the links already described, or simply reloading the page (in fact, every time you reload the page, the offers/bids already submitted are automatically displayed).

Figure 60: the list of the offers/bids.

Observing the filters, you may notice that you can see the bids/offers by range of the flow dates, type of transaction (sale and/or purchase), and offer/bid status. You can also specify the offer/bid ID or the xml message ID on which the offer/bid was conveyed.

The table shows details such as: the market, the volume submitted, the output volume (we shall return to this section later), the accepted volume (visible only upon the session confirmation), the price, the price at which the offer/bid was accepted, the flow date, the date of submission of an offer/bid (or its latest update), the code of the Participant that has sent the offer/bid, the type of offer/bid, the offer/bid status, the offer/bid ID, the User who sent the offer/bid, the code of the storage Participant and any notes.

SESSIONS PAGE

Continuing with the series of the pages, we find the page with the list of the market sessions. It shows all the MBS sessions, indicating the ID of the session for each of them, the flow date, the opening hours, the closing hours, the market and the status. As for the status, a session can be **opened**, **closed** or **completed**. Open sessions allow the submission of offers/bids and their management (**change** or **withdrawal**). A closed session does no longer accept offers/bids or modifications of those already submitted. A session is completed when it was performed, and the pairings were confirmed and the marginal price was determined.

Figure 62: Results of market.

Below are shown instead the net positions of the Participants. Remember that they are shown only those Participants under competence of the User connected. For each Participant, it's shown the net position for each of the storage Participant.

DEMAND AND SUPPLY INTERSECTION CHART

In the sessions page, clicking [chart](#), it opens a popup containing information already reported in the previous two pages. In addition, it displays the chart with the intersection of the sales and purchase curves.

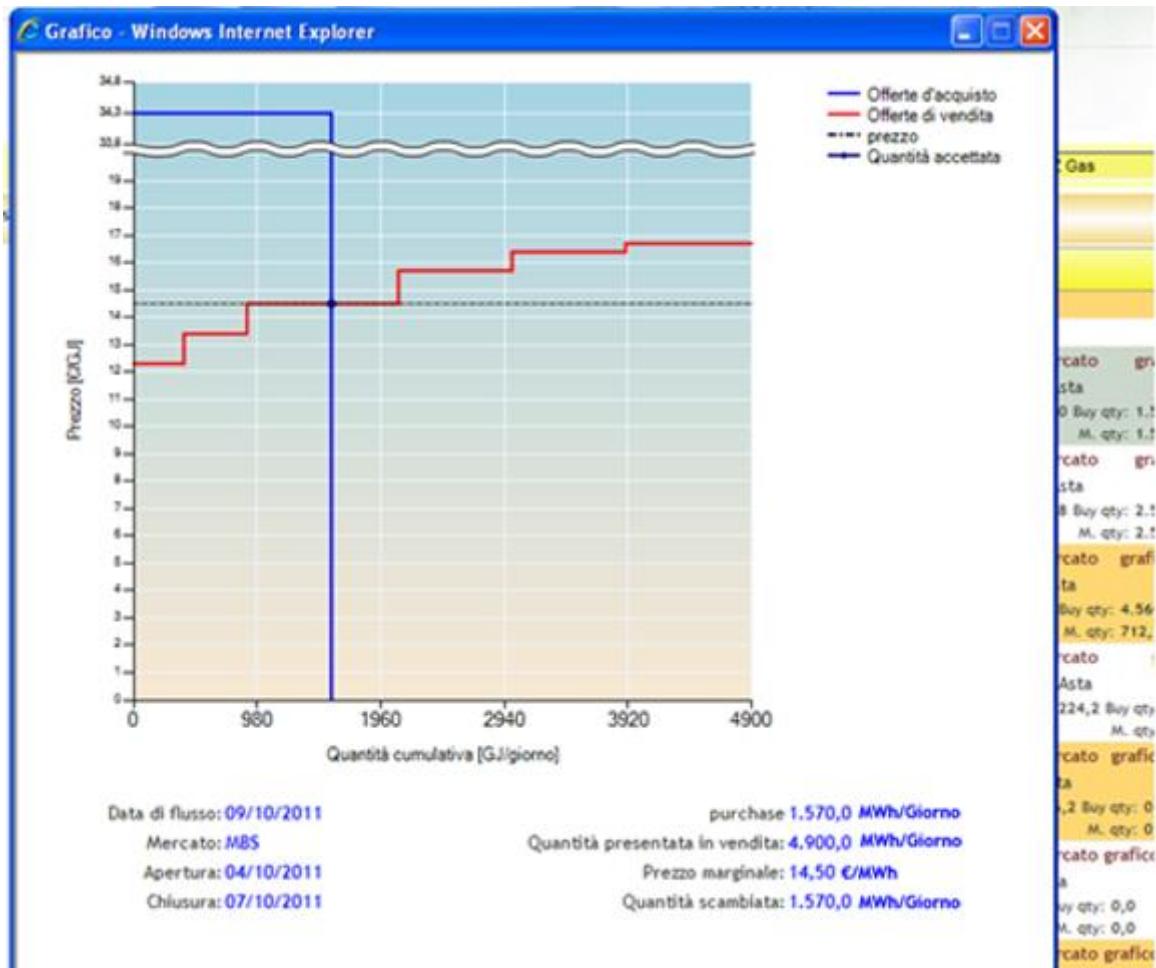

Figure 63: the chart with the intersection of the sales and purchase curves.

GUARANTEES MANAGEMENT

The guarantees management page allows the users to view but not modify the status of financial guarantees relating to the forward gas market (MT) in relation to the participants they represent.

The first report contains information such as the code and the operator's name, the initial amount of financial guarantees, the last payment date and the last paid date.

By clicking "dettagli" (details) you may view the underlying report, which provides details of financial guarantees and credit / debit adjustment.

SUMMARY OF MP GUARANTEES

On the summary of MP guarantees page, you may view but not modify the status of the financial guarantees of the participants that the user represents (Figure 61).

- in the section “Sommario Garanzie MP” (Summary of MP Guarantees) the initial guarantee (the amount of valid guarantees registered on the Netting platform, reduced by the Maintenance Margin of 3%); Guarantee Capacity (the difference between Initial Guarantee and Exposure); the Exposure (the exposure determined by all the positions held on all the platforms whose guarantee pertains to Netting);
- in the section “Dettaglio Garanzie” (Guarantees Detail) all the deposits and bank guarantees relating to the centralized Netting guarantee system and the credit and debit adjustment of the MP spot gas market;
- in the section “Esposizione per data di settlement” (Exposure by Settlement Date), all exposures divided by settlement date determined by all the positions held on all the platforms whose guarantee pertains to Netting, and the valid credits of the MP spot gas market only.

Figure 65: summary of MP guarantees.

By clicking on **details**, you may view a pop-up containing the details of the financial guarantee formulas, in which all items and the relative amount can be identified (Figure 62).

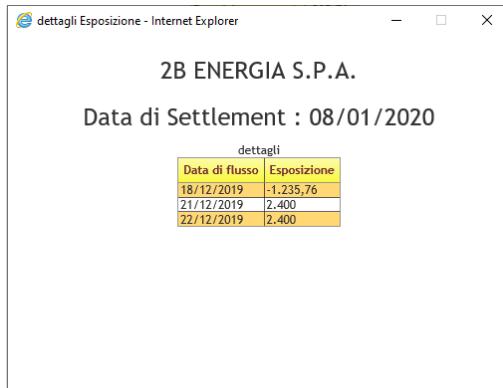

Figura 66: details of the financial guarantee

UPLOAD

After the section of the menu called MGS, let's now turn to the last section, namely the [messages](#). The [upload](#) page is used to forward the system the xml files described in detail in the [implementation guide](#).

This manual will exclusively show how to upload a file. Please remember that you can select a Participant referred to in the xml file, otherwise the message will be rejected by the system. Clicking **browse**, you select the xml file and clicking **Upload file**, you load it on the system, after signing the contents of the file. The outcome of the transaction submitted to the system can be controlled in the [messages list](#) page, analyzed below.

MESSAGES LIST

This page displays all the input messages and the output ones from the system. Please note that they are displayed not only the XML files submitted via the upload page: every transaction on the system by the normal pages of the platform are then translated into xml files and stored in the database. Therefore, the message list also shows those transactions made through web pages.

Let's analyze in detail the columns that make up the table. Message ID is also a link that allows you to view the original xml message detailing the transaction. Similarly, the ID of the message out, allows you to view the **FA**, or the outcome of the transaction. The third column allows you to view the contents signed at the time of submission via web pages. It tracks the status of the message, the Participant code, the User who submitted the file, the file name, the timestamp, the success rate of the transaction (for example, if within the same xml file, you submit 4 offers/bids and only three of them are accepted by the system, the column will show 3 -> 4), finally, it is shown the processing time.

Figure 673: the messages list.

The filters available allow you to select the messages with timestamps within a given range of dates.

The **mark** checkbox instead allows you to mark the output messages as downloaded, where they are viewed by clicking the ID out message.

DYNAMICS OF A MARKET SESSION

In order to better understand the dynamics of a market session, below are some typical scenarios.

SUBMISSION OF BIDS/OFFERS

As previously reported, each Participant may submit up to twenty offers/bids for each of the storage Participant. 10 of these are purchase offers/bids and 10 are sale offers/bids.

The Participant can take note of those who are its maximum and minimum margins for the purchase and for the sale and submit bids/offers accordingly. However, the system, at the time of acceptance of the bids/offers, will not implement any control over margins, not reporting the Participant so any failure to meet the situation of margins.

CLOSING OF THE SESSION AND ITS COMPLETION

Upon the close of the session, the Participant cannot submit bids/offers. First the margins are checked for each Participant.

MARGINS CHECK

There are different scenarios, regarding the margins check:

- 1) **The Participant has submitted bids/offers in respect of margins.**
- 2) **The Participant has exceeded the maximum margin:** it is the case in which (given a storage Participant and given a kind of bid/offer) the sum of the amount of submitted and accepted offers/bids from the system exceeds the maximum margin. In this case, offers/bids are ordered by economic merit and the amounts (at time of the less meritorious bid/offer) are cut to meet the margin. The offers/bids characterized by retouched amount shall be accompanied by a note "**MARGIN VIOLATION**" possibly linked to the note entered by the Participant, as shown in Figure . Cut amount column shows the cut amount or the amount that will be taken into account by the algorithm, after cutting for breach of the margin.

Figure 69: report on margins with failure to meet the margins.

INVALIDATION OF THE OFFERS/BIDS

After checking the margins, the system proceeds to invalidate the Participants' offers/bids that have the same offer/bid type submitted by SNAM Rete Gas. These offers/bids are marked as **invalid**.

GUARANTEE CHECK

The next step involves the guarantee check on those offers/bids submitted by Participants. The more significant scenario involves the overcoming of the financial guarantee available to the Participant. In that case the offers/bids are subject to a deduction of the amount in order to meet the financial guarantee. Then it can happen that some offers/bids are marked as **invalid** and others have a decreased amount. **Invalid** and curtailed offers/bids show "**WARRANTY LIMIT EXCEEDING**" in the notes.

EXECUTION AND PRO RATA ALLOCATION OF BIDS/OFFERS

At this point the market can form the **price** and the **marginal quantities**, crossing the demand and supply curves.

It may happen that there are more offers/bids submitted with a price that will turn out to be the marginal one. In this case it implements the *pro rata* allocation of the offers/bids, dividing the amount of competence, among all bids/offers at the marginal price. The amount is distributed in percentage, weighing the amount submitted. Possible residues are allocated starting from the temporally oldest offer/bid.

MARKET OUTCOMES

After the session, you can view the summary details through the already examined the sessions page.

On the messages list page, the market outcomes and bid notifications are also made available. The first report the price and the marginal volumes and submitted volumes for sale and purchase. The bid notifications instead of the results of the bids/offers, showing details such as the marginal price, the amount awarded, the cut amounts, etc. Details of the format of these files are available in the **implementation guide**.

MANUAL FOR THE PARTICIPANT OF THE LOCATIONAL PRODUCTS MARKET (MPL) PLATFORM

THE HOMEPAGE

Figure shows the main page of the portal. Here four main always available areas are numbered whatever the User open page.

USER DETAILS AND LOGOUT

The area (1) shows the authenticated User name and his/her role (**User** or **viewer**). Immediately next, there is a dropdown menu that lets you choosing the language with which to display the contents of the portal. The content of the pages will be translated on the basis of the selected language. Besides the translation of text parts, changing the language also involves displaying the date in Italian (it-IT) or English (en-GB) format and the decimal separator for the figures: the comma (",") for Italian and the dot (".") for English.

By clicking the  icon, you can leave the portal, closing the session. Now the User must re-authenticate if he/she wants to access the portal.

Figure 70: the main page of the portal

THE ALLOWED PARTICIPANTS

(2) displays a drop down menu containing all Participants authorized to operate on the MPL, the current User's competence. The operations that the User performs on the portal, such as the submission of offers/bids, are associated with the selected Participant in that menu.

THE MENU

Section (3) shows the menu that contains the links to all the pages that the User can achieve.. There is an **information** section where all the pages bearing information useful to the Users are grouped. **MPL** section contains the pages for the submission and monitoring of the offers/bids and the results of the market sessions,

Finally, the **messages** section shows the pages to upload xml file and the list of input and output messages of competence of those Participants associated to the User.

THE MAIN CONTENTS

The last section, which is the (4), shows the contents of the pages. The home page, that is the one shown in Figure , is the page that contains the communications to Participants.

FILTERS AND REPORTS

Before you scroll through the pages of the portal, it is necessary to explain a common feature to all the pages that show a report.

lista messaggi									
Id messaggio	Id messaggio out	Contenuto	Oggetto del messaggio	Stato del messaggio	op.	codice utente	Nome file	Timestamp	Transazione
			Select Message E					21/10/2013 - 22/10	

Figure 71: filters and reports in Excel..

Each report page has a filters section that usually is not shown when the page is opened. To show it, you must click the  icon in the upper-right group. Conversely, to hide it, you must click instead the  icon. The one that appears is the filter section in which, in general, you can enter values that aim to restrict the number of results provided by the underlying report. To recharge the report taking account of appropriate filters, it is necessary to click . Finally, you can export the report to Excel format by clicking . After clicking, the page asks you to save the report in Excel format, bringing all the results, obviously without pagination of them like it happens on the web page.

Some filters are shown for convenience on the columns. In Figure , the penultimate "enabled" column contains a filter that shows all possible values. After changing the filter, the refresh is automatic.

USERS PAGE

The users page shows the list of users entitled to operate for a participant. The page is read-only and shows data such as user code, name and surname, telephone, email, certificate of authentication and signature of all users entitled to operate for the same participant.

ADDING A NEW SIGNATURE CERTIFICATE

Through the signature management link, you CAN access the page that offers users the possibility to manage their signature certificate. If the user does not have a signature certificate, the page looks like in Figure 11; the link "Aggiungi" (Add) allows the user to add a certificate.

Figure 74: the user does not have a signature certificate. The page allows you to add one.

By clicking on the link “Aggiungi” (Add), you can choose, among the certificates installed on the user's computer, what you wish to use to sign the transactions being uploaded on the system, as shown in Figure 12.

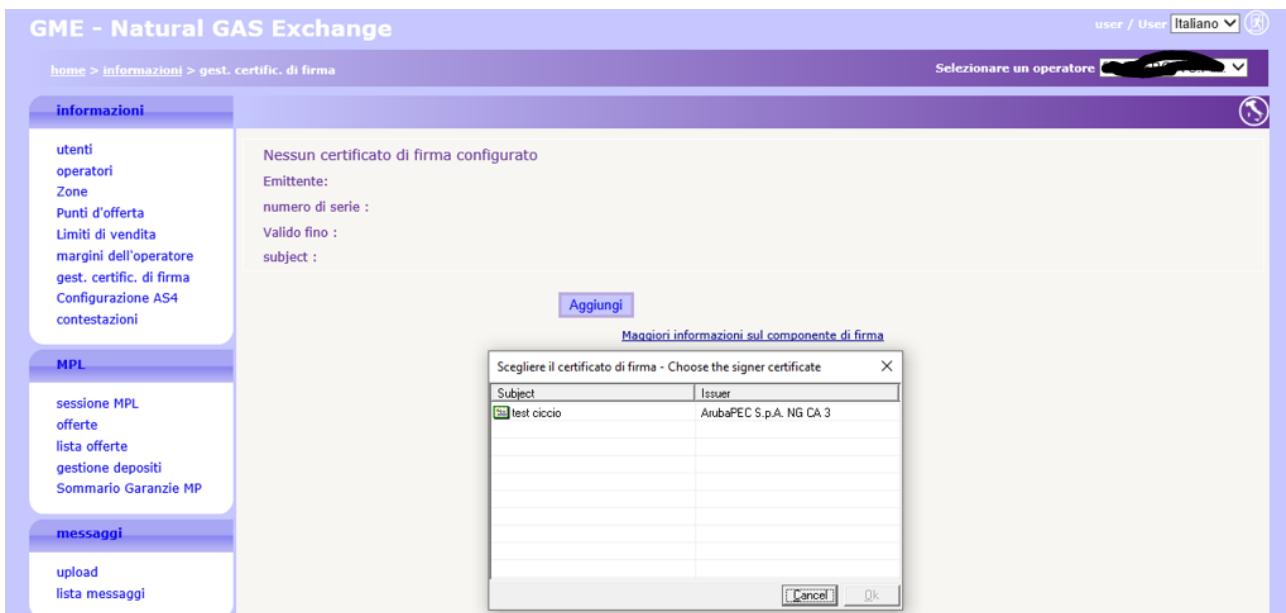

Figure 75: insertion of a new certificate

Once the certificate has been selected, its details are shown on the page. At this point, the user must confirm the insertion of the certificate by clicking on the link “Salva” (Save).

Figure 76: details of the certificate being inserted

Once the certificate has been inserted, before it can be used in transactions, it must be authorized by the portal administrator.

THE ZONES PAGE

The zones page is another read-only page that allows to view all the areas in which the user is admitted to operate on behalf of the participant selected in the dropdown menu at the top right and the maximum inter-zonal flows that can move from one area to another in both directions.

Zone	Codice Zona	descrizione	abilitato
IMPORT1		Import	<input checked="" type="checkbox"/>
PSV		The PSV zone	<input checked="" type="checkbox"/>
EDISON1		Edison Stoccaggio	<input checked="" type="checkbox"/>
GNL		LNG	<input checked="" type="checkbox"/>

Vincoli Interzonal	Zona 1	Zona 2	Da 1 a 2	Da 2 a 1	Funzione di costo	Descrizione
Zone for G+1 offers	The PSV zone	900000,000	899000,000	0,0	G1 to PSV	
Residuale Iniezione SRG	The PSV zone	900000,000	899000,000	0,0	STG to PSV	
Zone for G+n offers	Zone for G+1 offers	900000,000	899000,000	0,0	GN to G1	
LNG	The PSV zone	900000,000	899000,000	0,0	GNL to PSV	
Import	The PSV zone	900000,000	899000,000	0,0	IMP to PSV	

Figure 77: the zones page

THE SALES LIMITS PAGE

The sales limits screen indicates the participant's operating margin selected in the dropdown menu at the top right, by filtering by date flow.

SellLimit	op. ▲	data	margine operativo € [€]

Nessuna riga da visualizzare

Figura 78: the sales limit page

COMPLAINTS

- Figure shows the page of the complaints through which you can monitor the progress of the claims. Any complaint can be inserted and then updated by associating new messages. You can see the list of all the complaints made by Participant, in particular: The title of the complaint, the state, the company code (Participant) which the complaint relates, the User who submitted the complaint, the timestamp indicating the time of submission and then a link relating to: The messages associated with the selected complaint
- Possibility to add a new message to the already open complaint.

The screenshot shows the 'GME - Natural GAS Exchange' interface. In the top right corner, there is a language selection dropdown set to 'Italiano'. Below it, a button says 'Selezionare un operatore' followed by a redacted name. On the far right, there are three icons: a green plus sign, a person icon, and a circular arrow icon. The main content area has a purple header 'informazioni' and a sidebar with links like 'utenti', 'operatori', 'Zone', 'Punti d'offerta', 'Limiti di vendita', 'margini dell'operatore', 'gest. certific. di firma', 'Configurazione AS4', and 'contestazioni'. The sidebar also includes a 'MPL' section with links for 'sessione MPL', 'offerte', 'lista offerte', 'gestione depositi', and 'Sommario Garanzie MP'. The central part of the screen displays a table titled 'lista offerte' with columns for 'titolo', 'stato', 'cod. operatore', 'utente', 'timestamp', and 'link'. One row is shown: 'contestazione' (status: 'in attesa'), '00041', 'user', '20/12/2019 15:30:19', 'messaggi | nuovo messaggio'. At the bottom of the table, there are pagination controls: 'Pagina 1 - N° totale pagine: 1', '110 Righe per pagina', and 'Righe da 1 a 1 - N° di righe totali: 1'.

Figure 79: the complaints page.

With the icon, you can then open the window to add a complaint, as shown in Figure

This screenshot shows a form for entering a complaint. At the top, it displays 'cod. operatore' as '0123GD' and 'utente' as 'test'. Below these, there are two input fields: 'titolo' (title) and 'testo' (text). The 'titolo' field is empty, while the 'testo' field contains a large text area with scroll bars. At the bottom of the form is a blue 'submit' button.

Figure 80: the page for entering complaints.

OFFER/BID POINTS

Continuing with the series of pages, please find the [Offer/bid points](#) page. It a report that lists the offer/bids points on the platform. By default, only the products being traded today dare shown. You can still change the filter values, by accessing the hidden panel for the management of the filters.

Punti d'offerta

Figure 81: the offer/bid points page.

The columns displayed are respectively: the code of the offer/bid point, the description, the reference Participant, competence area, the enabling, the enabled markets, any proxy.

SENDING THE OFFERS/BIDS

The [offers/bids](#) page allows you to manage your bids/offers for a specific market session, i.e. the sending, modification and revocation. The page looks like in Figure .

Analyzing the page, at the top, there is a drop down menu with the list of sessions open to the submission of bids/offers; on right, there is another drop-down menu listing all offer/bid points for which the Participant is authorized to operate. Once you selected the offer/bid point, you can send (and generally managed) specific offers/bids of that offer/bid point.

Just below you can view summary information such as the volume presented for sale, the number of bids/offers already submitted in that session, the sales limit for that Participant (if already communicated by SNAM Rete Gas) and finally the details of the bid/offer submitted by SNAM Rete Gas (if it has already been forwarded to the system).

Further below again, there is the vector of the offers/bids, compilable by the User.

The screenshot shows a web-based application interface for managing offers/bids. The URL is <http://meallinone1/PBZGasWebSite/Offers>. The left sidebar contains a navigation menu with sections like 'offerte', 'File', 'Modifica', 'Visualizza', 'PREFERITI', 'Strumenti', and links to 'GAS 2', 'GAS1', 'GME...', 'Ipex1', 'MPEG1', 'MTE1', 'MTE2', 'GME'. The main content area is titled 'offerte' and shows a summary table with columns 'offerte presentate' (0), 'marginale operativo €' (0,000 €), and 'margini dell'operatore' (0,000 MWh). Below this, a table lists multiple rows for new offers, each with fields for 'id offerta', 'Prezzo [€/MWh]', 'Quantity [MW]', 'tipo di offerta' (set to 'acquisto'), 'reference' (date 17/11/2017), and an 'Inserisci' button. A note field and a 'firma e invia' button are also present. The bottom right corner shows the GME logo and 'Gme S.p.a'.

Figure 82: the offers/bids submission page.

SUBMISSION OF ONE OR MORE OFFERS/BIDS

Figure 83shows an example of sending of two offers/bids: a sale offer/bid and a purchase offer/bid. To send, you must previously select an offer/bid point and fill the fields related to the price and quantity (expressed in MW).

The screenshot shows the GME web interface for offer submission. The main area displays two offers with their details:

id offerta	Prezzo [€/MWh]	Quantity [MW]	tipo di offerta	reference	punto d'offerta	SRGOfferType	SRGPrice	SRGQuantity
763322	10,000	100,000	acquisto	16/11/2017	Passo Gries		0,000 €/MWh	0,000 MWh
763323	15,000	200,000	vendita	16/11/2017	Passo Gries		0,000 €/MWh	0,000 MWh

The sidebar on the left contains navigation links for 'informazioni', 'MPL', and 'messaggi'. The 'messaggi' section includes links for 'upload', 'lista messaggi', and 'messaggi in Home Page'. The GME logo is located at the bottom of the sidebar.

Figure 83: submission of one or more offers/bids.

Pressing "sign and send", you proceed with the phase of the transaction signature. There are all the details that characterize the offer/bid. Moreover also it shows the operation performed (in this case "enter"); then you will see other possible operations.

Sta per essere inviata un'offerta con questi dati:								
id offerta	Prezzo [€/MWh]	Quantity [MW]	tipo di offerta	reference	punto d'offerta	Sessione di mercato	operazione	Offerte predefinite
763322	10,000	100,000	acquisto	16/11/2017	Passo Gries	PBZ1 - 16/11/2017	modifica	<input type="checkbox"/>
763323	15,000	200,000	vendita	16/11/2017	Passo Gries	PBZ1 - 16/11/2017	modifica	<input type="checkbox"/>

Figure 84: signing and submitting two offers/bids.

After the sending of transactions, you can monitor the results of the transactions by clicking the "Upload FA" button, as shown in Figure 85. When the *Functional Acknowledgment* will be available, you will see a link that lets you download the xml file locally. You can still review the outcome of the transaction at any time, via the [messages list](#) page.

Figure 85: loading the FA.

Now, reloading the page and selecting the previously selected offer/bid point for the submission of bids/offers, you can view the bids/offers already submitted in the offer/bid vector. For these offers/bids, it is also enhanced the first field (offer/bid ID), indicating the unique identifier characterizing each offer/bid on the system). The overlying summary boxes are enhanced simultaneously with the offers/bids submitted to the system.

id offerta	Prezzo [€/MWh]	Quantity [MW]	tipo di offerta	reference	operazione

Figure 86: the already submitted bids/offers

MODIFICATION AND WITHDRAWAL OF OFFERS/BIDS

In Figure 86, it is important to note that for each element of the vector containing an already submitted offer/bid, you can perform a couple of transactions through the last drop-down menu: modification and revocation.

offerte

Sessione di mercato PBZ1 - 16/11/2017 punto d'offerta Passo Gries

offerte presentate	2	SRGOfferType	
margine operativo €	0,000 €	SRGPrice	0,000 €/MWh

Figure 87: modification and withdrawal of offers/bids

In Figure 88 for example, we revoke the first offer/bid and modify the amount of the second offer/bid. Then we proceed with the submission. The summary box that needs to be digitally signed reports the two operations separately. It's also enhanced the offer/bid ID field.

Sta per essere inviata un'offerta con questi dati:

id offerta	Prezzo [€/MWh]	Quantity [MW]	tipo di offerta	reference	punto d'offerta	Sessione di mercato	operazione	Offerte predefinite
763322	10,000	100,000	acquisto	16/11/2017	Passo Gries	PBZ1 - 16/11/2017	modifica	<input type="checkbox"/>

firma e invia

Figure 89: confirmation of the modification and revocation.

OTHER OFFERS/BIDS SENDING

If the offers/bids vector contains already offers/bids, you can send additional offers/bids, without modifying the existing ones. This ensures that the existing offers/bids do not lose time priority.

Figure 92: the sessions list.

GUARANTEES MANAGEMENT

The guarantees management page allows the users to view but not modify the status of financial guarantees relating to forward gas market (MT) in relation to the participants they represent.

The first report contains information such as the code and the operator's name, the initial amount of financial guarantees and the last paid date.

By clicking  you may view the underlying report, which provides details of financial guarantees and credit/debit adjustment.

The screenshot shows the 'gestione depositi' (Deposit Management) section of the GME platform. On the left, a sidebar lists various menu items under 'informazioni' (Information), 'MPL' (Market Price List), and 'messaggi' (Messages). The main content area displays a table titled 'gestione depositi' with columns: op. (operator), ragione sociale (business name), Quantità iniziale (Initial Quantity), ultima data in pagamento (Last Payment Date), and ultima data pagata (Last Paid Date). A single row is shown with values: op. [REDACTED], ragione sociale [REDACTED], Quantità iniziale 50000,000, ultima data in pagamento 15/12/2019, and ultima data pagata 17/11/2019. Below this table, a message states 'dettagli operatore : 2B ENERGIA S.P.A.' and a link 'visualizza garanzie chiuse' (View closed guarantees). At the bottom of the table, there are pagination controls and a note 'Righe da 1 a 3 - N° di righe totali:3'. A 'Chiudi dettagli' (Close details) button is located at the bottom right of the table.

Figure 93: financial guarantee.

By checking the **show closed guarantees** box, you may view possible closed financial guarantees and credit/debit adjustments.

SUMMARY OF MP GUARANTEES

On the summary of guarantees page, you may view but not modify the status of the financial guarantees of the participants that the user represents (Figure 85). For each participant, the page shows the code, the registered name, and

- in the section “Sommario garanzie MP” (Summary of MP Guarantees) the initial guarantee (the amount of valid guarantees registered on the Netting platform, reduced by the Maintenance Margin of 3%); Guarantee Capacity (the difference between Initial Guarantee and Exposure); the Exposure (the exposure determined by all the positions held on all the platforms whose guarantee pertains to Netting);
- in the section “Dettaglio Garanzie” (Guarantees Detail) all the deposits and bank guarantees relating to the centralized Netting guarantee system and the credit and debit adjustment of the MP spot gas market;
- in the section “Esposizione per data di settelemento” (Exposure by Settlement Date), all exposures divided by settlement date determined by all the positions held on all the platforms whose guarantee pertains to Netting, and the valid credits of the MP spot gas market only.

The screenshot shows the 'sommario garanzie' (Summary of Guarantees) table. The columns are: op. (operator), ragione sociale (business name), garanzia prestata (Guaranteed Amount), esposizione (Exposure), and a 'dettagli' (details) button. The table lists 13 operators, all named 'MyOperator' followed by a number (1 through 13). The 'garanzia prestata' column shows values like 10000,000, 1000000,000, etc. The 'esposizione' column shows values like 0, 16287,000, -9150,000, etc. The 'dettagli' button is present for each row. At the bottom of the table, it says 'N° di righe totali:13'.

Figure 494: summary of guarantees

By clicking on **details**, you may view a pop-up containing the details of the financial guarantee formulas, in which all items and the relative amount can be identified (Figure 86).

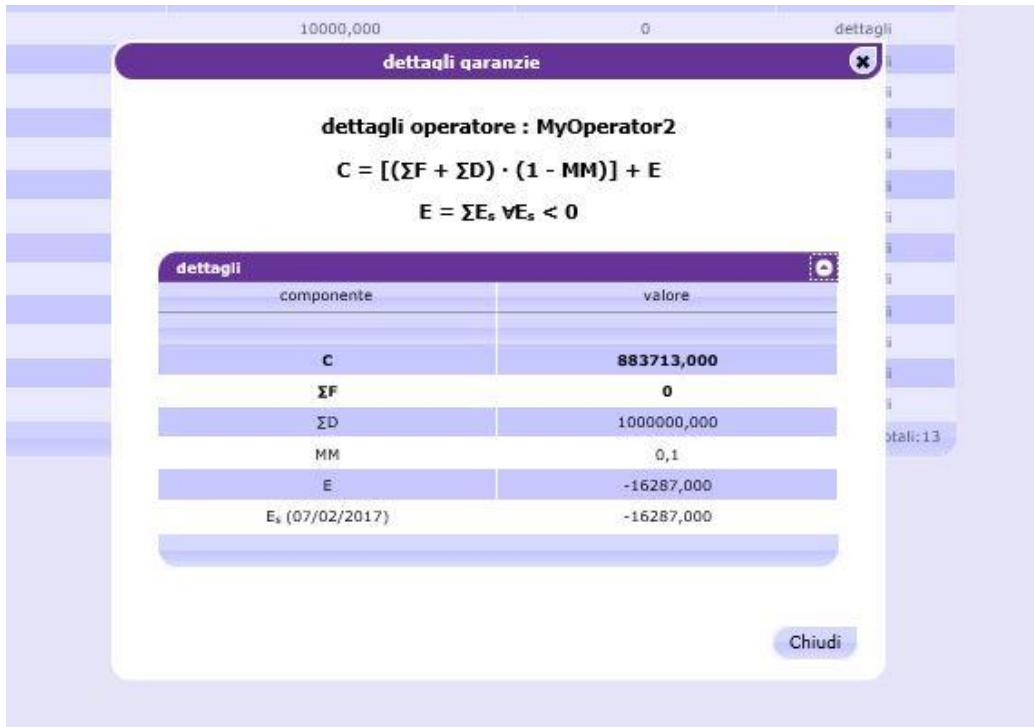

Figure 95: details of the financial guarantee.

UPLOADING THE XML FILES

Through the [upload](#) page, the User can directly upload the xml file for submission/modification of the bids/offers or for change of the bids/offers (Figure).

Figure 96: uploading xml files.

The User must prepare the xml file with a dedicated editor and then arrange the upload by selecting the file, by signing the content and proceeding with the submission of the transaction.

MESSAGES LIST

Any action submitted by the User to the MPL system through the web pages described above, takes the form of an XML file, stored in the database and then processed by the platform. Every action filed on the system generates a result (called **Functional Acknowledgment, FA**), also in the form of XML files, whatever the outcome of the action accomplished.

The list of xml transactions submitted and the relevant result are displayed in the [messages list](#).

Figure 97: the messages list.

The page is organized as follows: the first column displays the unique ID attributed to the input xml message, produced by User interaction with the portal pages. Clicking the number representing the ID, you can download the XML file showing all the input parameters that have originated the transaction.

The second column, in the same way, returns the file ID of the outcome of the transaction. By clicking the number, you can download the FA, in xml format. The third column shows the link to the content digitally signed, or the piece of HTML code that makes up the preview of every action, submitted immediately before the action (that reported for example in Figure).

Then they are displayed the message subject and especially the status of the message that can vary between the following:

- **IN:** submitted and stored but not yet processed message.
- **ERR:** bad formed or incorrect content message.
- **RUN:** message being processed.
- **OUT:** processed message (failed or successful).

The remaining columns show information such as the User and the Participant who submitted the transaction, the xml file name, the date and time of submission, the number of transactions processed successfully, and the processing time, in minutes and seconds..

Among the page filters, there is a *checkbox* called **mark** (Figure). If selected, it causes the system to mark the outcome file as downloaded. This action has impact on download of files via web service, because the system will ignore the already downloaded files, returning only those that are still not being examined by the User. By downloading an XML file interface, with **mark checkbox** selected, will result in failure to download the same file through web service.

data inizio : <input type="text" value="21/10/2013"/> data fine : <input type="text" value="23/10/2013"/> Mark: <input type="checkbox"/>

Figure 98: the messages list filters.

We have seen how every action (input xml transaction) matches a result xml file (FA). The [messages list](#) displays also result files other than the FAs, which does not correspond to any input file. Figure 88 first line, shows a **Bid Notification (BN)** that reports the outcome of a combination of an offer/bid of the Participant.

Another type of result file is the **Zonal Market Result**, which shows the aggregate results for each area supported by the market.

THE FEATURES ALLOWED BY THE MAST PORTAL

In this section shows the features offered by the MAST portal. First of all, the user must be entitled to the portal.

THE HOME PAGE

Figure 66 shows the main page of the portal. It lists the four main areas, always available, whatever the page opened by the user.

USER DETAILS AND LOGOUT

Area (1) shows the name of the authenticated user and his role (**user, viewer**). Next to it there is a drop-down menu that allows you to choose the language of the contents of the portal. The content of the pages will be translated on the basis of the selected language. In addition to the translation of the textual parts, the change of language also entails displaying the date in Italian (it-IT) or English (en-US) format and the decimal separator for the figures: the comma (",") for Italian and the dot (".") for English.

By clicking on the icon  on the right you can leave the portal, closing the session. At this point the user must authenticate again to access the portal.

Figure 99: main page of the portal

ENTITLED PARTICIPANTS

Section (2) shows a drop-down menu containing all the participants entitled to operate on the MAST, under the responsibility of the current user. The operations that the user carries out on the portal, such as the submission of bids/offers, are associated with the operator selected in that menu.

THE MENU

In section (3) there is the menu containing the link to all the pages that the user can reach. There is an **information** section where all the pages containing information useful to users are grouped. The MAST section contains the pages for submitting and monitoring the bids/offers and the results of the market sessions, and the read-only pages that display the management of deposits and the summary of participants' guarantees.

Finally, the **messages** section contains the pages for uploading the xml files and the list of input and output messages pertaining to the participants associated with the user.

THE MAIN CONTENT

The last section, (4), shows the content of the pages. The home page, namely the page shown in Figure 66, is the page that contains communications to participants.

FILTERS AND REPORTS

Before analysing the pages of the portal, it is necessary to illustrate a feature common to all the pages showing a report.

Figure 100: filters and Excel reports

Each page with reports has a filter section that does not usually appear when opening the page. To display it, you need to click on the icon of the group at the top right. Conversely, to hide it, you must click on the icon instead. Here you can see the section of filters where, in general, it is possible to insert values that aim to limit the number of results provided by the report below. To reload the report taking into account the appropriate filters, click on . Finally, you can export the report in Excel format by clicking on . After clicking, the page asks to save the report in Excel format, reporting all the results, without obviously paging them, as happens on the web page.

THE USERS PAGE

The users page shows the list of participants entitled to operate on MAST. The page is read-only and contains only the information regarding the company name and the participant code.

Figure 102: list of participants entitled to the platform

ADDING A NEW SIGNATURE CERTIFICATE

Through the signature management link, you CAN access the page that offers users the possibility to manage their signature certificate. If the user does not have a signature certificate, the page looks like in Figure 11; the Add link allows the user to add a certificate.

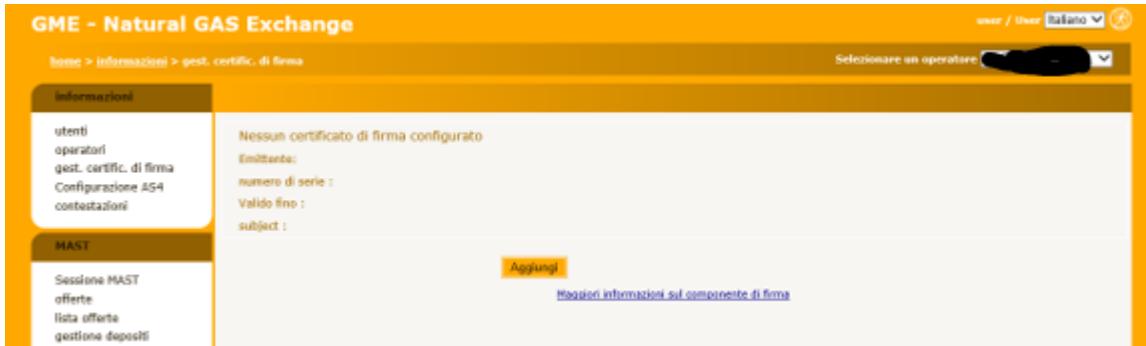

Figure 103: the user does not have a signature certificate. The page allows you to add one.

By clicking on the Add link, you can choose, among the certificates installed on the user's computer, the one you wish to use to sign the transactions being uploaded on the system, as shown in Figure 12.

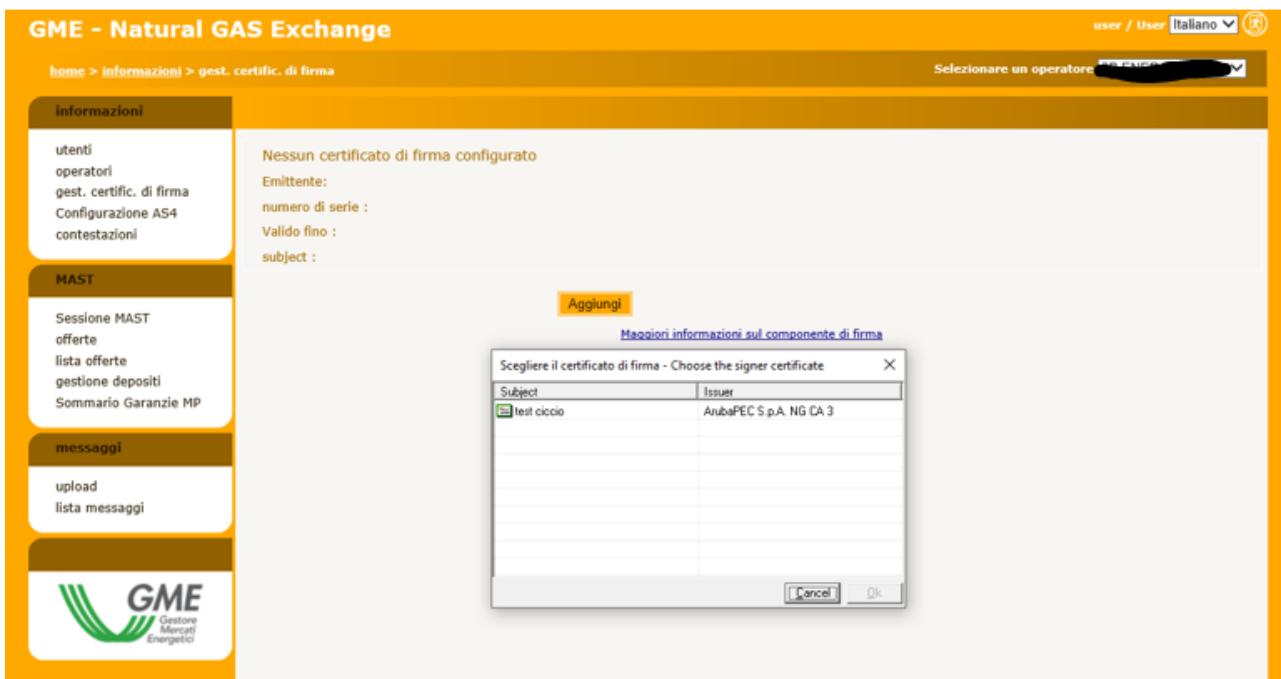

Figure 54: insertion of a new certificate

Once the certificate has been selected, its details are shown on the page. At this point, the user must confirm the insertion of the certificate by clicking on the **Save** link.

The screenshot shows the 'Informazioni' section of the GME portal. On the left, there's a sidebar with links: 'utenti', 'operatori', 'gest. certific. di firma', 'Configurazione AS4', and 'contestazioni'. Below that is the 'MAST' section with 'Sessione MAST', 'offerte', 'lista offerte', 'gestione depositi', and 'Sommario Garanzie MP'. At the bottom is the 'messaggi' section with 'upload'. The main content area displays a certificate configuration. It includes fields for 'Emittente', 'numero di serie', 'Valido fino', and 'subject'. Buttons for 'Rimuovi' and 'Salva' are at the bottom, along with a link to 'Maggiori informazioni sul componente di firma'. The top right shows user information ('user / User Italiano') and a dropdown for 'Selezionare un operatore'.

Figure 65: details of the certificate being inserted

Once the certificate has been inserted, before it can be used in transactions, it must be authorized by the portal administrator.

COMPLAINTS

- Figure shows the page of the complaints through which you can monitor the progress of the claims. Any complaint can be inserted and then updated by associating new messages. You can see the list of all the complaints made by Participant, in particular: The title of the complaint, the state, the company code (Participant) which the complaint relates, the User who submitted the complaint, the timestamp indicating the time of submission and then a link relating to: The messages associated with the selected complaint
- Possibility to add a new message to the already open complaint.

The screenshot shows the 'lista offerte' (list of offers) section. It displays a table with columns: titolo, stato, cod. operatore, utente, timestamp, and link. One row is visible with values: titolo 'qqqqq', stato 'chiuso', cod. operatore '00041', utente 'user', timestamp '28/11/2019 12:10:18', and link 'messaggi'. At the bottom, there are pagination controls ('Pagina: 1 - N° totale pagine: 1', 'Righe per pagina: 200', 'Righe da 1 a 1 - N° di righe totali: 1') and icons for adding (+) and editing (edit).

Figure 106: complaints page.

By using the icon you can then open the window to add a complaint, as shown in Figure 72.

Figure 107: the page for inserting complaints

MAST SESSION

By clicking on MAST session you open the page showing the market sessions of the current day and the previous three days (Figure 83). The information displayed regarding the session flow date, the session opening and closing dates, the session status, the aggregated results (including the SRG TSO bid/offer) and finally the button that allows you to view the net positions separated by operator and by offer point. From the first box of the "flow date" column, however, you can select any session or range of past sessions by flow date.

Figure 108: the MAST session page.

SUBMITTING BIDS/OFFERS

The bids/offers page allows you to manage your bids/offers for a specific market session, i.e. sending, changing and revoking. The page looks like Figure 74.

On analyzing the page, we notice, at the top, a drop-down menu with the list of sessions open to the submission of bids/offers. Once the session has been selected, you can send (and generally manage) the specific bids/offers of that session through the vector of the maximum number of allowed bids/offers that can be filled in by the user.

The bids/offers will be considered valid during the execution phase only when having opposite sign compared to the sign of the net balance of the bids/offers submitted by SRG TSO.

GME Gestore Mercati Energetici

Figure 111: signing and submitting two bids/offers

After the sending of transactions, you can monitor the results of the transactions by clicking the "Upload FA" button, as shown in Figure 25. Figure 77. When the Functional Acknowledgment will be available, you will see a link that lets you download the xml file locally. You can still review the outcome of the transaction at any time, via the messages list page.

Figure 113: bids/offers already submitted

MODIFICATION AND REVOCATION OF BIDS/OFFERS

In Figure 79 it is important to note that for each element of the vector containing a bid/offer already submitted, you can carry out a couple of operations, through the last drop-down menu: modification and revocation.

Firma e invia

Figure 114: modification and revocation of bids/offers

In Figure 80, as an example, we consider the first bid/offer and change the quantity of the second bid/offer (expressed in MW). We then proceed with the sending. The summary box that must be digitally signed shows the two operations separately. The offer id field is also valued.

The screenshot shows a software interface titled "GME - Natural GAS Exchange". On the left, there's a sidebar with sections for "informazioni" (users, operators, certificates, configuration, contests), "MAST" (session MAST, offers, list of offers, deposit management, Garanzie MP), and "messaggi" (upload, message list). The main area has a title "Sta per essere inviata un'offerta con questi dati:" followed by a table with two rows:

id offerta	Prezzo [€/MWh]	Quantity [MW]	tipo di offerta	reference	Sessione di Mercato	operazione	Offerte presentate
963667	20,000	20,000	acquisto	30/11/2019	MGP - 29/11/2019 13:30	modifica	<input type="checkbox"/>
963668	10,000	10,000	acquisto	30/11/2019	MGP - 29/11/2019 13:30	revoca	<input type="checkbox"/>

Below the table is a yellow button labeled "firma e invia".

Figure 115: confirmation of the modification and revocation

SUBMITTING OTHER BIDS/OFFERS

If there are already bids/offers in the bid/offer vector, you can submit additional bids/offers without changing existing ones. This ensures that pre-existing bids/offers do not lose time priority.

The screenshot shows the same software interface as Figure 115. The main area now displays a table titled "offerte presentate" with one row:

id offerta	Prezzo [€/MWh]	Quantity [MW]	tipo di offerta	reference	operazione
963667	20.000	20.000	acquisto	30/11/2019	modifica

Below this table is a large input field for new offers, containing several rows of placeholder data:

new	5	5	acquisto	30/11/2019	Inserisci
new	4	4	acquisto	30/11/2019	Inserisci
new	3	3	acquisto	30/11/2019	Inserisci
new			acquisto	30/11/2019	Inserisci
new			acquisto	30/11/2019	Inserisci
new			acquisto	30/11/2019	Inserisci
new			acquisto	30/11/2019	Inserisci
new			acquisto	30/11/2019	Inserisci
new			acquisto	30/11/2019	Inserisci

At the bottom left is a note input field, and at the bottom right is a yellow "firma e invia" button.

Figure 116: submitting other bids/offers.

LIST OF BIDS/OFFERS

The bids/offers list page shown in Figure 82 shows the bids/offers for the selected participant.

Figure 117: list of bids/offers.

Details are provided such as: the quantity (expressed in MWh/day), the quantity traded (valued only after market execution and always expressed in MWh/day), the quantity rejected for exceeding sales limits (valued only after the market execution and always expressed in MWh/day), the type of bid/offer (sale or purchase), the submitted price, the accepted price (valued only after market execution), the value of the bid/offer, the creation date of the bid/offer, the status of the offer, the user who sent it, the bid/offer id and any notes.

With regard to net positions, only participants responsible for the user currently authenticated on the system are shown.

GUARANTEE MANAGEMENT

On the “[gestione garanzie](#)” (guarantee management) page, you may view the situation of the financial guarantees relating to the forward gas market (MT) for the participants that you represent.

The first report shows data such as the code and registered name of the participant, the initial amount of the financial guarantee and the last date of payment and the last paid date.

By clicking on you will open the underlying report, with details about the financial guarantees and the credit/debit adjustments.

SUMMARY OF MP GUARANTEES

The page “**Sommario garanzie**” (Summary of Guarantees) page allows you to view, yet not modify, the status of the financial guarantees relating to the forward market (MT) of participants that you represent (85) relating to the spot gas market. For each participant selected from the drop-down menu there are:

- in the section “Sommario garanzie MP” (Summary of MP Guarantees) the initial guarantee (the amount of valid guarantees registered on the Netting platform, reduced by the Maintenance Margin of 3%); Guarantee Capacity (the difference between Initial Guarantee and Exposure); the Exposure (the exposure determined by all the positions held on all the platforms whose guarantee pertains to Netting);
- in the section “Dettaglio Garanzie” (Guarantees Detail) all the deposits and bank guarantees relating to the centralized Netting guarantee system and the credit and debit adjustment of the MP spot gas market;
- in the section “Esposizione per data di settelemento” (Exposure by Settlement Date), all exposures divided by settlement date determined by all the positions held on all the platforms whose guarantee pertains to Netting, and the valid credits of the MP spot gas market only.

The screenshot shows the GME - Natural GAS Exchange web application. The top navigation bar includes links for 'User / User' and 'Italiano'. A sidebar on the left contains sections for 'Informazioni' (utenti operatori, gest. certific. di firma, Configurazione AS4, contestazioni), 'MAST' (Sessione MAST, offerte, lista offerte, gestione depositi, Sommario Garanzie MP), and 'messaggi' (upload, lista messaggi). The main content area displays three tables: 'Sommario Garanzie MP' (Garanzia Iniziale: 10.670.000, Capienza Garanzia: 10.670.000, Esposizione: 0), 'Dettaglio Garanzie' (Deposit: 970.000, Deposit: 9.700.000, Credit: 1.000), and 'Esposizione per data di Settlement' (Data di Settlement: 03/12/2019, Esposizione: 1.000). The GME logo is visible at the bottom left.

Figure 119: summary of guarantees

By clicking on **details**, you may view a pop-up containing the details of the financial guarantee formulas, in which all items and the relative amount can be identified (Figure 86).

The screenshot shows a modal dialog titled 'dettagli Esposizione' (Details Exposure) with a close button ('X'). It displays the settlement date as 'Data di Settlement : 03/12/2019'. Below this, a table titled 'dettagli' (Details) shows the exposure breakdown by flow date:

Data di flusso	Esposizione
28/11/2019	1.000

A 'Chiudi' (Close) button is located at the bottom right of the dialog.

Figure 120: details of the financial guarantee.

UPLOADING THE XML FILES

Through the [upload](#) page, the User can directly upload the xml file for submission/modification of the bids/offers or for change of the bids/offers (Figure).

Figure 121: upload of xml file.

The User must prepare the xml file with a dedicated editor and then arrange the upload by selecting the file, by signing the content and proceeding with the submission of the transaction.

MESSAGES LIST

Any action submitted by the User to the MPL system through the web pages described above, takes the form of an XML file, stored in the database and then processed by the platform. Every action filed on the system generates a result (called **Functional Acknowledgment**, FA), also in the form of XML files, whatever the outcome of the action accomplished.

The list of xml transactions submitted and the relevant result are displayed in the [messages list](#).

Figure 122: message list.

The page is organized as follows: the first column displays the unique ID attributed to the input xml message, produced by User interaction with the portal pages. Clicking the number representing the ID, you can download the XML file showing all the input parameters that have originated the transaction.

The second column, in the same way, returns the file ID of the outcome of the transaction. By clicking the number, you can download the FA, in xml format. The third column shows the link to the content digitally signed, or the piece of HTML code that makes up the preview of every action, submitted immediately before the action (that reported for example in Figure).

Then they are displayed the message subject and especially the status of the message that can vary between the following:

- **IN**: submitted and stored but not yet processed message.
- **ERR**: bad formed or incorrect content message.
- **RUN**: message being processed.
- **OUT**: processed message (failed or successful).

The remaining columns show information such as the User and the Participant who submitted the transaction, the xml file name, the date and time of submission, the number of transactions processed successfully, and the processing time, in minutes and seconds..

Among the page filters, there is a *checkbox* called **mark** (Figure). If selected, it causes the system to mark the outcome file as downloaded. This action has impact on download of files via web service, because the system will ignore the already downloaded files, returning only those that are still not being examined by the User. By downloading an XML file interface, with **mark checkbox** selected, will result in failure to download the same file through web service.

The screenshot shows the 'GME - Natural GAS Exchange' application. At the top, there's a navigation bar with 'emanuele / Administrator' and a language dropdown set to 'Italiano'. Below the navigation, a search bar says 'Selezionare un operatore' followed by a redacted name. On the left, a sidebar titled 'Informazioni' lists 'utenti', 'operatori', 'gest. certific. di firma', 'Configurazione AS4', and 'contestazioni'. The main area is titled 'lista messaggi' and contains a table with columns: id msg, Id messaggio, Contenuto, Oggetto del messa, Stato del messa, op., codice uter, Nome file, timestamp, Transazior, and elab. time. A single row is visible: id msg 1457996, Id messaggio MBBN, Contenuto OUT, op. 00041, Nome file MBBN_b41380d4e3-28/11/2019 02:5. Above the table, there are filters for 'data inizio' (28/11/2019), 'data fine' (29/11/2019), and a 'Mark:' checkbox. There are also search and refresh icons at the top right of the main area.

Figure 123: the messages list filters.

We have seen how every action (input xml transaction) matches a result xml file (FA). The [messages list](#) displays also result files other than the FAs, which does not correspond to any input file. Figure 88 first line, shows a **Bid Notification (BN)** that reports the outcome of a combination of an offer/bid of the Participant.
