

### **Technical Rule no. 09 rev. 01 ME**

(pursuant to Article 4 of the Integrated Text of the Electricity Market Rules,  
approved by the Decree of the Minister of Productive Activities of 19 December 2003,  
as subsequently amended and supplemented)

<b>Title</b>	<b>Unit of measurement</b>
Regulatory requirements	Article 5, para 5.1, subparas. a) and b), Integrated Text of the Electricity Market Rules

**Published on**

## 1. Foreword

Article 5, paragraph 5.1, subparas. a) and b) of the Integrated Text of the Electricity Market Rules provides that, for the purposes of the market, the units of measurement of electricity and capacity are the MWh and MW, respectively, specifying the number of decimals indicated in the Technical Rules.

## 2. Units of measurement

For the purposes of carrying out activities of trading in the market and of registration on the PN:

- a) the volumes of bids/offers submitted by Market Participants into the MGP, MI-A, MI-XBID, MPEG, and MTE are expressed in capacity and the unit of measurement is the MW, specified with 1 decimal;
- b) the volumes of bids/offers submitted by Market Participants into the MSD are expressed in capacity and the unit of measurement is the MW, specified with 3 decimals.
- c) the volumes nominated by Participants on the Nomination Platform (PN) are expressed in capacity and the unit of measurement is the MW, specified with 3 decimals.

The unit of measurement of electricity is the MWh, specified with 3 decimals and defined by multiplying the value of the volume of capacity in MW by the duration expressed with respect to the hour (h) of the period to which the product refers (15 minutes =  $\frac{1}{4}$  h; 30 minutes =  $\frac{1}{2}$  h; and 60 minutes = 1 h).
